

# HONEYWELL AUTONOMYX

Enterprise-Level Outcomes-Based Consulting

## OUR MISSION

To support industrial leaders through end-to-end enterprise transformation by aligning strategy, technology and execution with clearly defined business objectives. Honeywell AutonomyX provides tailored advisory consulting services that draw upon Honeywell's industrial domain expertise in automation, AI, digital reliability, enterprise OT cybersecurity and energy – applying that knowledge to help customers evaluate, plan and implement transformation initiatives suited to their operations.

## OUR APPROACH

Honeywell AutonomyX is Honeywell's enterprise-level consulting practice, structured to support industrial organizations in planning, structuring and executing complex operational and digital transformations across refining, chemicals, energy, power, mining and core process industries through the following capability sectors:

## CROSS-PILLARS ENABLERS

AI AND  
AUTONOMOUS

DIGITAL  
RELIABILITY

ENTERPRISE  
CYBERSECURITY

ENERGY  
ADVISORY

## WHY HONEYWELL AUTONOMYX

- **Enterprise Consulting Focus:** Guiding customers from strategy development through execution and scale.
- **End-to-End Engagement Model:** Support from assessments and roadmaps through implementation and value realization.
- **Outcomes-Based Approach:** Modular, use-case-driven engagements aligned to customer priorities.
- **Scalable Value Delivery:** Designed to support phased deployment across operations and assets.

### For Customers who:

- Expect more from enterprise consulting and technology partners
- Are addressing decarbonization, digitalization, reliability and operational efficiency at increased scale and complexity
- Seek measurable business outcomes from transformation initiatives, with structured accountability
- Require consistency and scalability across sites, fleets and regions

**Honeywell**
