

How to Download Software

What is Electronic Software Download?

HPS provide great support to customers by delivering the required software electronically. The software delivery process is enhanced and made to download the ordered software through electronic media. This enables our customer to get the software delivery on time and also allows software download multiple times, if required.

The software downloads are facilitated for the customers through Honeywell Process solutions portal.

Honeywell Software Download Process Prerequisites

Honeywell validates your registration details like account mentioned on registration before supporting the download process to make the software download process quick and reliable. Below are the basic criteria that should be fulfilled to process for Honeywell software download:

1. You should be the customer / affiliate / employee / channel partner of Honeywell with valid account created for you.
2. You should have valid email Id mapped to your account.
3. Order for product software should have been placed to Honeywell order management team and processed.
4. You should have received a mail from Honeywell order management team with a link to login for downloading the software.

In case you have a valid account with Honeywell and still facing any difficulties in downloading the software that you have ordered, send an email to hpsweb@honeywell.com

Download through Browser

The mail received from Honeywell order management will have the details of the product software you have ordered along with MSID (the agreement ID you had with Honeywell). Here are the steps to follow to download the software:

1. Click on Login in the mail you have received from Honeywell Order Management team which will take you to **process.honeywell.com** portal
