GLOBAL HONEYWELL ACADEMY E-LEARNING SUBSCRIPTION UPDATE

Global Honeywell Academy Training Solutions

Global Honeywell Academy's [E-Learning Subscription program](#) launched in earlier this year is attracting several customers. The subscribers get access to 150+ Asynchronous (AT) and Modular (MT) training courses for 1 full year – or more depending on your contract.

Since the launch, Honeywell Academy has added several new courses and updated the releases of added courses. [Click Here](#) is browse through the current list of Asynchronous and Modular courses available to subscribers.

New Asynchronous Training course:

EXP-1024-AT: This 5-day training course provides participants with the information and ability to install, migrate and troubleshoot both the hardware and software of an Experion PKS system connected to the TPS with Experion LCN, ELCN bridges, UEA Appliance and virtual ELCN nodes, EHPM, Unified System Management and lot more. [Click here](#) for the course flyer.

New Modular Training course:

EXP-7107-MT: This 100 minute on-demand MT course describes Experion Unified Engineering Tools that allows the user to configure EHPM, AM control strategies and CL programs within Control Builder.

Contact Honeywell Academy for more details and/or enrollment:

1. For Americas-Canada-Latin America: HPSTrainingUSCANLAR@Honeywell.com
2. For Europe-Middle East-Africa: HPS-Training-EMEA@honeywell.com
3. For Asia Pacific: HPS-Training-India@honeywell.com

For other inquiries, please reach out to your local Honeywell Account Manager for assistance.

EHPMX and C300PM Release Announcements

Leverage all the Possibilities of a Modern, Unified Process Control Platform with EHPMX and C300PM

From the introduction of Process Manager (PM) in the 1980s, to the recent Enhanced High Performance Process Manager (EHPM), Honeywell has continued to advance its control solutions to keep pace with the demands of industrial operations around the world. Today, Honeywell has taken its best-in-class technology a step further by offering the true process controller of the future with all the features customers are looking for in a modern device.

EHPMX and C300PM, are flexible and cost-effective solutions designed to provide a unified process control platform. The new controllers share a modern common hardware and enable seamless technology evolution for customers seeking longevity for their controllers as well as to utilize the features (in the case of C300PM) of the state-of-the-art C300 process controller while retaining a familiar form factor. EHPMX and C300PM have performance improvements over EHPM, has an embedded control firewall, as well as embedded I/O Link processor.

With EHPMX, Honeywell supports the decades of valuable customer control strategies and customer applications throughout their lifecycle. There is no need to change Advanced Process Control (APC) and base Regulatory Control strategies, rebuild points or modify operator displays. Instead, you can focus on investments with the highest return. EHPMX shares common hardware with C300PM and with an easy on-process migration (just involving a firmware update), customers can migrate to the next generation C300PM controller.

The C300PM (in addition to all of the features of EHPMX) provides the best of both worlds—it combines the features of the EHPM and C300 in an EHPM form factor. This solution enables users to seamlessly evolve their HPM installations to gain access to the

most advanced Experion PKS control functions and capabilities like Control Execution Environment (CEE), Advanced Batch Automation, Custom Algorithm Blocks, Experion HIVE I/O Network and many leading industrial communication protocols, including Peer Control Data Interface (PCDI), Profinet, EtherNet/IP, OneWireless™, FOUNDATION Fieldbus and Profibus.

With these controllers, companies undertaking plant renovations or unit expansions can upgrade their controller install base with a solution that provides a common engineering environment, retain decades of engineering configurations, and focus on the new strategies that offer the most value when upgrading from the PM family of controllers. With on-process migration to these controllers from HPM, customers do not have to wait for outages in most cases. This solution eliminates concerns about changing the controller platform, modifying control strategies, and replacing I/O devices and coexists with our existing EHPM solution.

It should be noted that EPKS R520.2 TCU1 and TPN R690.2 are required for migrations to either EHPMX or C300PM controllers.

Coaxial TPN Parts support and Last Time Buy update

In System HINTS 2021 issues, Honeywell notified Customers that all TPN coaxial-based nodes will transition to Phased-out lifecycle status on December 31, 2025. Honeywell also announced Last Time Buy (LTB) purchase availability for several TPN coaxial parts. In the August 2022 HINTS newsletter, we informed customers of continuing supply chain challenges impacting components used In TPN and supporting TPN migrations. Honeywell is restating our intent to continue TPN coaxial part support as previously communicated. Enabling TPN modernization from coaxial-based nodes to Experion equivalents remains a top priority, with emphasis on “bridging” nodes that facilitate transitioning LCN/UCN networks to the Experion FTE network.

The previously announced coaxial part support follows:

- Current - June 30, 2025 - unchanged for coaxial parts ordering process for spares and failure replacements.
- June 30, 2025 - closure date for LTB and spare parts orders
- July 1, 2025 - December 31, 2025 - exchange-only orders for TPN coax parts for failure replacements.
- No later than December 31, 2025 - LTB and spare parts orders shipped to all Customer sites.

Effective October 1, 2022:

- Due to supply chain challenges, parts supplied to satisfy parts order requests may include new or Certified Recycled Parts (CRP). New or CRP items will be communicated in the parts quotations with their respective prices.
- All shipped CRP coaxial parts will be certified and have the same hardware warranty as new parts.

Honeywell recommends the following to meet modernization schedules and availability of critical spares:

1. Order equipment well in advance of plant migrations, upgrades, and expansions to ensure sufficient time for all project activities, including staging, acceptance testing, and commissioning.
2. Order coax UCN/LCN products under the last time buy (LTB) program as soon as possible.

An updated list of LTB coaxial parts follows. Two infrastructure items have been added:

Node Type	Part Nos	Part Description	Node Type	Part Nos	Part Description

Your account team will be delighted to assist with migration planning in preparation for TPN coaxial nodes transition to Phased-Out status and can provide information and support related to this announcement.

TPN R690.2 Release Announcements

TPN R690.2 point release is available for shipment

TPN R690.2 offers two new features:

1. C300PM/EHPMX support
 - a. Expanding customer migration options with the new EHPMX that compliments the C300PM
 - b. Enables a progression to full CEE capabilities with a simple firmware personality change from EHPMX to C300PM
2. Significant simplification of TPN release migration with. "One-Click Migration" improvements over the past few TPN releases
 - a. The new release migration approach minimizes on-site effort for TPN customers to stay current with the latest TPN release
 - b. Once Initiated by the maintenance engineer, the TPN release upgrade is fully automated till completion
 - c. The TPN software migration remains on-process, with no changes to the end user Installed Intellectual property

Additionally, TPN R690.2 release includes PAR fixes for:

- PMIO primary failover - PN2021-18A
- ELCN EST failure after NIM to ENB upgrade - PN2022-09

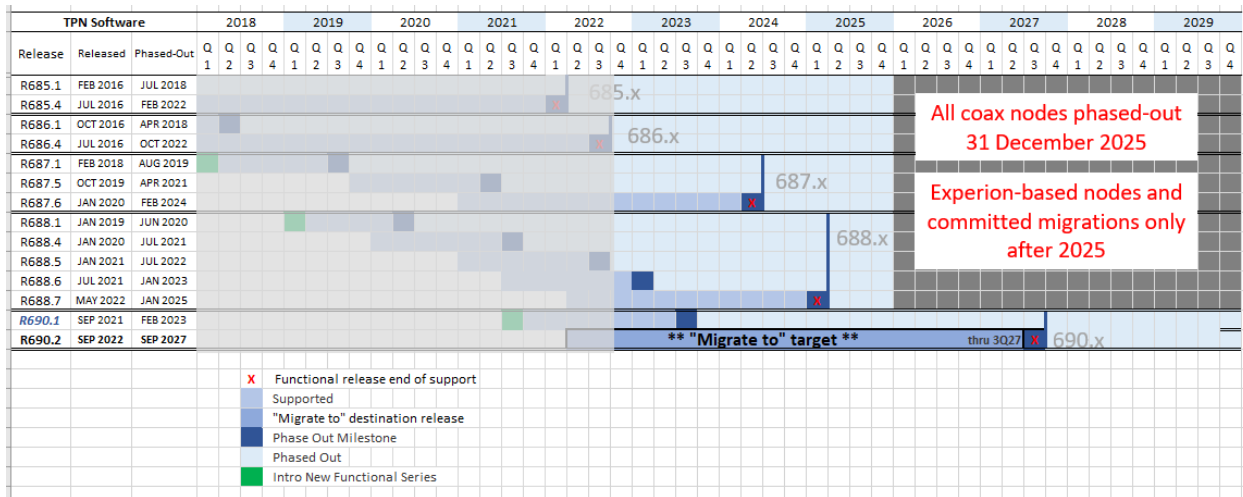

With latest TPN release migration simplification, Honeywell strongly recommends all end users to stay current with the latest TPN release. TPN R690.2 now becomes THE target release for any TPN migration

TPN software releases are available for electronic download and CD/DVD media distribution.

For more details related to this software release, refer to TPN R690.2 SCN.

TPN System software releases support plans as of September 2022 are shown below:

It should be noted that TPN R688.5 was phased out In July 2022 and TPN R688.6 will be phased-out In January 2023

ARE YOU READY? Enabled Services R130 is COMING !

Enabled Services, will deliver exciting new capability.

These new features, available in Honeywell’s Enabled Services cloud hosted platform will further reduce the time and effort required for control system administration, support, and maintenance.

Enabled Services R130 will include a long sought-after feature to notify you when Priority Notifications, Be Aware Advisories, Security Notifications, Knowledge Sharing Mails, or Retrofit Announcements are published by Honeywell. These notifications will be filtered based on the assets you have in your Enabled Services system. No longer will you have to review e-mails and scroll through a list of notifications to see what applies to you. Enabled Services will provide a list, like the following, for you to assess. It will also include a link directly to the related knowledge article.

Dashboard > Product Notification Summary							
17 All 15 Priority Notification 1 Security Notification 0 Knowledge Sharing Mails 1 Be Aware 0 Retrofit Announcement Letter

Furthermore, Enabled Services R130 will introduce some additional key GTAC checks for Virtualization, Support for McAfee ENS, and additional GTAC Network Audit checks including the following:

FTE Checks

- FTE Port Checks
- Multicast & Gateway IP
- Net Bios Checks
- Version Uniformity
- Jumbo Packet
- Duplicate Device
- Max Routing Hops
- FTE Node Limit
- IPV6

Switch Checks

- Spanning Tree Priority
- Split switch configuration
- License check for 9200/9300
- Runts/Giants Monitoring

For more information on Enabled Services please check out:

<https://process.honeywell.com/us/en/initiative/enabled-services/enabled-services>

Premium Platform Gen3 Release Announcement

Honeywell has qualified and released sales availability for the Premium Platform Gen3. As announced at the May 2022 Honeywell User's Group in Orlando, the Premium Platform Gen3 is the successor to the Dell FX2-based Premium Platform Gen2 and maintains the same core VMware vSphere and vSAN features and benefits while introducing a design that provides better scalability, tighter integration between the hardware and software stacks, and broader hardware and design choices.

Detailed specifications, model numbers, and product information is available in the [HPS Virtualization Specification](#).

New way to access the System Inventory Tool portal

Honeywell has launched the new process.Honeywell.com website with an exciting new look and feel. One of the many new changes is how the user accesses the System Inventory Portal. Please follow the below steps to access the portal.

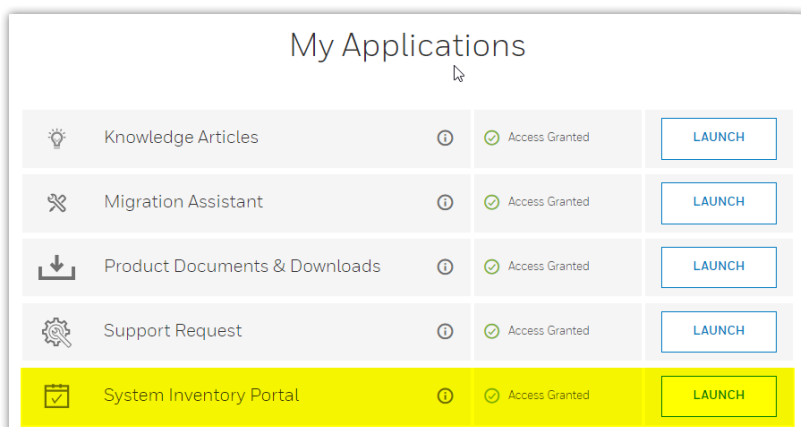

1. Go to <https://process.honeywell.com>
2. Sign in

3. Select your name and My Account

4. Scroll down and select "Launch"

This will now take you to the System Inventory Tool portal. The portal has not changed.

System Inventory Tool patch to support Experion R520.n is now available

Click [here](#) to download the software.

If the link does not work for you

1. Go to process.honeywell.com
2. Sign In
3. Select “Product Documents & Downloads”
4. Enter “System Inventory Tool” in the search box
5. Sort by “date”
6. Select “System Inventory Tool Software Download R300.1 patch 02”

System Inventory Tool (SIT) R300.1

The System Inventory Tool (SIT) R300.1 is offered for download from the System Inventory Tool Landing Page. This self-service tool can be installed on Experion PKS R400.8 or newer systems to scan the inventory details of the entire system, including the network as well as Cisco switches and associated nodes at predefined intervals. The tool generates an inventory file that users upload to the Support Portal to see their inventory details in a logical and graphical overview. The inventory file is also employed to support Honeywell’s automated online contract renewal process.

Provided at no cost for all Honeywell customers, both contracted and non-contracted, the SIT runs in the background and will not impact control system performance.

Once the SIT has completed its scan, a .cab file is created and then either the Honeywell technician or the customer uploads the inventory file to the System Inventory Portal. The portal will display the licensed software sourced from Honeywell, shipped hardware sourced from Honeywell, and inventoried asset data collected by the SIT.

Installation

The SIT R300.1 is a standalone installation, and therefore is not integrated with the Experion media package. While the SIT can be installed on Level 2 (L2) and Level 3 (L3), the installation and configuration on both levels are independent of each other. As such, users can choose to install the tool on either or both levels, depending on their control system requirements.

Information for R230 Users

Users who have installed the R230.1, R230.2 or R230.3 versions of the SIT should upgrade to R300.1 to ensure they have the latest support from Honeywell (unless they are currently running Experion R3xx.x, which is not supported by SIT R300.1). During the upgrade, their current SIT configuration will be retained.

Experion Compatibility

SIT Version	Supported Experion Version
R200.1	R301, R310, R400 and R430
R200.2	R301, R310, R400 and R430
R200.3	R301, R310, R400 and R430
R210.1	R3xx.x to R510
R210.2	R3xx.x to R510
R220.1	R3xx.x to R510
R230.1	R3xx.x to R510
R230.2	R3xx.x to R510
R230.3 (SIT patch must be installed on 32bit systems after R230.3 installation)	R400.8 to R511
R300.1	R400.8 to R515

QCS Compatibility

QCS Architecture Version	Experion PKS Layer	System Inventory Tool Release Support
RAE1xx	None	
RAE2xx	None	
RAE3xx	None	
RAE4xx	R101/201/210	No support
RAE5xx	R300/301/310/311	No support
R6xx	R 400.8	R300.1
R7xx	R5xx	R300.1

What is the System Inventory Tool and why is it needed?

Overview

The SIT provides a comprehensive system inventory documentation solution to support Honeywell's contract renewal process. The tool enables customers to complete their yearly contract renewal online through an automated system, better manage risk, prepare for any migrations, and ensure compliance and continuous evolution of their control system.

After the data is collected, it is uploaded to the System Inventory Tool portal, available at <https://process.honeywell.com>, go to your account and select System Inventory Portal as shown in the instructions in above.

The SIT collects asset data, which is then hosted in a secure Honeywell data center where the customer can view all their control system asset information (both hardware and software) through the System Inventory Portal. And, best of all, the tool is provided free of charge by Honeywell for all contracted and non-contracted sites and does not require an SESP contract or Assurance 360 service agreement.

Automated online contract renewals and more

The SIT was developed to support online contract renewals. Gone are the days of the laborious task of manually reviewing contract renewal worksheets, trying to track changes via emails and phone calls, and providing results in a timely manner. No more lost notes or questions such as, "What did we do

last year?” All updates and notes regarding asset quantities will be captured in the tool and carried forward year after year, making future contract renewals faster and easier.

But contract renewals are just once a year—what else can you do with the tool?

Support for migrations

Customers have a budget for a migration, and in many cases, it's "use it or lose it." So, how will they know where best to invest in their control system?

As a user, can you quickly review every MSID design, topology, and product support status for every asset? If you've uploaded your inventory asset data file to the System Inventory Portal, all this and more are just a mouse click away. And did we mention it's free? That's right—Honeywell offers this to all our customers at no cost. No contract or service plan of any kind is required.

Honeywell Updates

System Name : M [redacted] MSID : M [redacted] Product Name : Experion Server

Update Name

- ++ Patch Experion PKS R410.2 Honeywell Security Model - Workstation
- ++ Patch Experion PKS R410.2 Honeywell_HCI_Runtime
- ++ Patch Experion PKS R410 QBP Patch1
- ++ Patch Experion PKS R410 HMIWeb Station and Display Builder Patch 2
- ++ Patch Experion PKS R410.2 Configuration Studio Patch 1
- ++ Patch Experion PKS R410 Server Patch 7
- ++ Patch Experion PKS R410.2 Controller Patch
- ++ Patch Experion PKS R410.2 Honeywell_Safeview
- ++ Patch Experion PKS R410.2 Honeywell System Management Runtime

How can you view your data?

The System Inventory Portal allows customers and certain Honeywell account managers to see their account asset data. Within the portal, users can see all servers, stations, controllers, nodes, and switch hardware, as well as detailed information about each. Depending on which asset they're viewing, they can see the serial number, F/W, BIOS, installed software, support status, and much more.

To access the portal, go to honeywellprocess.com/support and login with the same credentials used when you registered.

Series C I/O

236IOLINK_1A	DI_HV_21	CC-PDIH01	21A	C	04.01.03	04.01.08	[redacted] 7

Not registered? No problem! Registration is free and takes less than a minute. Once you are registered, login and select the Support tab, then select the System Inventory tab.

Who can see your data?

All inventory data is viewable by only the customer, the customer's account manager, and Honeywell GTAC. In the event you call for support, GTAC can quickly obtain needed information such as F/W version, BIOS version, hardware rev, etc. No one else can ever see the data—not even other Honeywell employees.

HPS Priority Notifications

HPS Priority Notifications are available under

<https://process.honeywell.com/us/en/support/product-documents-downloads>

Be sure to check back regularly as new content is continually added in the form of notifications, *Be Aware* newsletters, Knowledge Base articles, and updates.

Please note that you have to sign in to access those documents.

Definitions:

“Software Package” means any HPS software product developed for the specific functional release of system software.

“Standalone Software” means any HPS software product developed for independent operation from a system software functional release.

“System Software” means machine-readable data and executable programs used to define the functionality of the HPS control system and standard hardware products, but does not include firmware, operating system, application software or other software products.
