Honeywell Users Group Europe, Middle East & Africa conference

The Steering Committee is looking forward to your papers.

Start to consider sharing your Honeywell solution or implementation success, during the 32nd in-person Honeywell Users Group EMEA, and we will waive your conference registration fee.

This advantage can save you up to 1,665 Euros!

Your presentation can be industry or solution specific contact, [see the page](#) or go straight to the [online form](#) to submit your presentation abstract, before July 15.

Mark your calendar for 2022 HUG EMEA: October 24-27 at the Madrid Marriott Auditorium, Spain. The conference registration and 2022 HUG EMEA website will open June 15.

And or for any further Users Groups inquiries feel free to contact: usersgroup@honeywell.com

2022 Honeywell Users Group EMEA organizational team.

GLOBAL HONEYWELL ACADEMY TRAINING SOLUTIONS

Global Honeywell Academy Training Solutions

Global Honeywell Academy's latest learning technology ensures that you and your organization continue to meet your Learning & Development goals. Our training solutions offer a wide range of courses allowing you to complete your planned training program now:

- Virtual Instructor-Led Training (VILT)
- Asynchronous Training (AT)
- Blended Learning (BL)
- In-Center Training
- On-Site Training

Honeywell Academy is pleased to offer our entire library of self-paced E-learning training courses to customers as a part of annual subscription services.

[HONEYWELL AUTOMATION SUBSCRIPTION SERVICE](#)

- Over 150 self-paced courses with more than 1,100 hours of learning material
- Covers Experion PKS, Field Device Manager, Trace, ControlEdge, HC900, Experion MX, QCS, and more product lines
- It can be purchased in convenient packs of either 1, 5, 10, 15, or 20 licenses

[HONEYWELL INDUSTRIAL SUBSCRIPTION SERVICE](#)

- Over 650 courses
- Covers Operations, Maintenance, and Environmental Health & Safety (EH&S) topics
- It can be purchased in convenient packs of either 1, 5, 26, 51, or 101 licenses

You may also be interested in our latest training solution of modular, flexible, on-demand and topic-based learning – [Modular Training \(MT\)](#). View [Demo](#).

Experion Computing Platforms Release Announcement

Honeywell has launched the new process.Honeywell.com website with an exciting new look and feel. One of the many new changes is how the user accesses the System Inventory Portal. Please follow the below steps to access the portal.

Honeywell has qualified and released sales availability for new Dell server and workstation platforms. The new server platforms replace previous generation Dell servers, and the new server platforms are available with the Trusted Platform Module (TPM) to address future operating system licensing requirements (non-TPM options are available on select servers for use in regions where TPM is not permitted).

The new workstation platform is a processor update to the Dell T5820XL and is available as an option for use with Experion PKS R520. Specification sheets for the new platforms are available at <https://process.honeywell.com/>.

Model Number	Description	Replaces
MZ-PCST01	SERVER HW DELL T150 STD TPM	MZ-PCSV77
MZ-PCSR01	SERVER HW DELL R250XE STD TPM	MZ-PCSV66
MZ-PCST02	SERVER HW DELL T550 STD TPM	MZ-PCSV78
MZ-PCST82	SERVER HW DELL T550 STD NO TPM	MZ-PCSV78
MZ-PCSR02	SERVER HW DELL R450 STD TPM	MZ-PCSV67
MZ-PCSR82	SERVER HW DELL R450 STD NO TPM	MZ-PCSV67
MZ-PCIS02	SERVER HW DELL XR11 PERF RACK TPM	MZ-PCIS01
MZ-PCWS94	WKS PC DELL T5820XL RAID1 TOWER MLK	N/A

Honeywell has released new thin client platforms based on the Pepperl+Fuchs BTC12 and BTC14 solution. Pre-installed with the Universal Thin Client Operating System, these platforms are available in dual screen and quad screen variants, and support for Honeywell operator console furniture and select peripherals is included. Specification sheets for the new platforms are available at <https://process.honeywell.com/>.

Model Number	Description	Replaces
TP-THNCL6-100	BTC12 THIN CLIENT UTC OS	TP-THNCL4-xxx
TP-THNCL7-100	BTC14 THIN CLIENT UTC OS	TP-THNCL5-xxx

The following Dell server and thin client platforms have transitioned to End of Sale status. The affected platforms include the following model numbers and their associated kits:

Model Number	Description	Successor Platform

TPN R688.7 Release Announcements

Honeywell has launched the new process.Honeywell.com website with an exciting new look and feel. One of the many new changes is how the user accesses the System Inventory Portal. Please follow the below steps to access the portal.

TPN R688.7 point release is available for shipment
 The TPN R688.7 release includes PAR fixes for:

- ELCN EST fail during load
- EHPM stability issues
- ENIM time synchronization issues

Following this announcement, the supported TPN releases are as follows:

- R690.1 - Current
- R688.7 - Supported
- R688.6 - Supported
- R688.5 - Supported
- R687.6 - Supported
- R686.4 - Supported

Product lifecycle phases are defined by the Standard Product Support Policy as per Customer Resource Manual Tab PD23.

Honeywell’s standard software release numbering scheme is RABC.D, where A = Series, B = Functional, C = Maintenance, and D = Point. TPS software releases will continue to follow the standard release numbering scheme. However, for TPN R680 and up only, the scheme is RABB.CD, in order to allow two digits for Functional release identification.

TPN software releases are available for electronic download and CD/DVD media distribution.

For more details related to this software release, refer to TPN R688.7 SCN.

TPN System software releases support plans as of May 2022 are shown below:

TPN Software			2018				2019				2020				2021				2022				2023				2024				2025				2026				2027				2028

Release Announcement - UniSim Design R491

The latest version of Honeywell's process simulation software, R491, was released on May 23, 2022. This is Honeywell's standalone software for modeling and digital twin applications for Upstream Oil & Gas, Engineering Procurement and Construction companies, Refineries and Sustainability. For Sustainability, UniSim Design enables customers to predict and model their facilities' CO2 emission performance, design Green H2 plants and design/expand Carbon Capture Utilization and Storage (CCUS) facilities. The latest release has the following key features:

- Sustainability:
 - Green H2 (MVP): PEM Electrolyzer Unit Operation has been added
 - CO2 Transportation: Speed improvements for Span Wagner and EOS-CG property packages; Span Wagner EOS: density prediction, speed improvement
 - CO2 emissions: Improved reporting directly to Excel

- Addition of DIPPR component property database as part of the base product

- Addition of REFPROP database and thermo engine as part of the base product

- Equation Oriented (EO) modeling:
 - Simplified EO Blowdown, solver improvements
 - A rigorous model & sample cases for EO MultiStream Heat Exchanger and LPG turbo expander process
 - Tighter integration with Petroleum Experts' software via exposing analytically calculated Jacobian for interoperability and speed-up
 - Data reconciliation utility upgrades for faster optimization (using the analytical Jacobian)
 - Demos, how-to user guides

- Downstream/refining
 - Improved FCC reactor tuning
 - Refining reactor calibration tool upgrade
 - SRU: Thermo upgrades for accurate S predictions

- GUI & Documentation:
 - Documentation Refresh: Comprehensive offline documentation is now easily accessible via a browser interface
 - New icons implemented for more modern look
 - (optional) New ribbon bar is available for access to commonly used functions and a dock for collapsible panels named SideBar

VMware vSphere 6.5 and 6.7 End of General Support

VMware vSphere 6.5 and 6.7 will reach the End of General Support period on October 15, 2022. Once vSphere 6.5 and 6.7 are in the Technical Guidance support phase, Honeywell will provide support for existing vSphere 6.5 and 6.7 customers to the extent that assistance is available from VMware; however, no further security updates or patches will be released by VMware for this release. vSphere 6.5 and 6.7 will remain in the Technical Guidance phase until November 15, 2023, and after this date Honeywell will no longer be able to provide support for vSphere 6.5 and 6.7.

For those customers still utilizing vSphere 6.5 and 6.7, Honeywell recommends developing a migration plan to upgrade to the currently supported vSphere 7 release. This will ensure that systems are eligible for security updates and patches and will also provide the best lifecycle experience from the Honeywell support organization.

A valid vSphere 7 license is required, and systems with active SESP contract coverage for VMware assets are entitled to a new license. Please refer to the HPS Virtualization Specification for applicable model numbers.

DynAMo® Operations Suite – R230 - End of Support Lifecycle

This communication is intended for the existing customers that have the R230.2 version of Honeywell Forge Operations Management (Erstwhile known as DynAMo Operations Suite (DOS)) product installed and running in one or more of their sites. This version of DOS was released in Apr 2019.

Honeywell announces end-of-life for the R230.2 version of DOS. The R230 version of DOS will be phased out of support effective Jun 1st, 2022. Customers are advised to upgrade to the latest release, i.e., Honeywell Forge Operations Management R244.1.

Contact

For details on the latest product support policy, please reach out to GTAC (HPS Technical Support). Customers with active and paid service and support contracts, are requested to contact their respective account managers or Honeywell's Global Support team for additional information.

TPA I/O – Phase out Announcement

Per this announcement Honeywell will phase out the Legacy TPA I/O cards and related components by June 30, 2023.

TPA I/O Cards will be moved to Phase-out lifecycle on June 30, 2023. For Migration planning of the TPA I/O cards, the following dates apply:

- Service part orders shall be submitted by the end of March, 2023
- Honeywell’s intention is to ship last service part orders by the end of June, 2023

To protect our customer’s automation investments, Honeywell supports robust, field proven, non-disruptive modernization path from Alcont TPA I/O’s to Control Edge 900 I/O’s via Experion PMD IO Hive Technology. The migration can be done in phased manner while retaining customer IP, and it will allow seamless convergence of TPA/PMD to standard Experion PKS platform and thereby have additional technologies and benefits of “Experion HIVE” and Experion native HMI faceplates and shapes.

Please work with your Honeywell account manager to develop committed IO migration approach prior to the above deadline.

Below are the list of TPA I/O components effected by this announcement. Keep in mind that due to global supply chain challenges, component supply may be impacted earlier as it has become increasingly difficult to procure legacy components which are no longer widely used in the market.

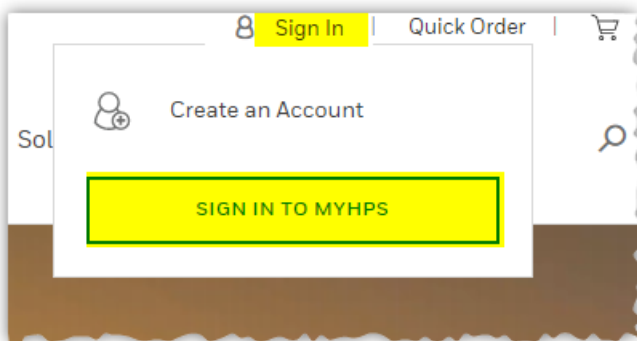

Item Nr.	SAP Description
800976	MAI/20MA/N/03 MULTI CHANNEL ANALOG INPUT

New way to access the System Inventory Tool portal

Honeywell has launched the new process.Honeywell.com website with an exciting new look and feel. One of the many new changes is how the user accesses the System Inventory Portal. Please follow the below steps to access the portal.

1. Go to <https://process.honeywell.com>

2. Sign in

3. Select your name and My Account

4. Scroll down and select “Launch”

This will now take you to the System Inventory Tool portal. The portal has not changed.

System Inventory Tool (SIT) R300.1

The System Inventory Tool (SIT) R300.1 is offered for download from the System Inventory Tool Landing Page. This self-service tool can be installed on Experion PKS R400.8 or newer systems to scan the inventory details of the entire system, including the network as well as Cisco switches and associated nodes at predefined intervals. The tool generates an inventory file that users upload to the Support Portal to see their inventory details in a logical and graphical overview. The inventory file is also employed to support Honeywell’s automated online contract renewal process.

Provided at no cost for all Honeywell customers, both contracted and non-contracted, the SIT runs in the background and will not impact control system performance.

Once the SIT has completed its scan, a .cab file is created and then either the Honeywell technician or the customer uploads the inventory file to the System Inventory Portal. The portal will display the licensed software sourced from Honeywell, shipped hardware sourced from Honeywell, and inventoried asset data collected by the SIT.

Installation

The SIT R300.1 is a standalone installation, and therefore is not integrated with the Experion media package. While the SIT can be installed on Level 2 (L2) and Level 3 (L3), the installation and configuration on both levels are independent of each other. As such, users can choose to install the tool on either or both levels, depending on their control system requirements.

Information for R230 Users

Users who have installed the R230.1, R230.2 or R230.3 versions of the SIT should upgrade to R300.1 to ensure they have the latest support from Honeywell (unless they are currently running Experion R3xx.x, which is not supported by SIT R300.1). During the upgrade, their current SIT configuration will be retained.

Experion Compatibility

SIT Version	Supported Experion Version
R200.1	R301, R310, R400 and R430
R200.2	R301, R310, R400 and R430
R200.3	R301, R310, R400 and R430
R210.1	R3xx.x to R510
R210.2	R3xx.x to R510
R220.1	R3xx.x to R510
R230.1	R3xx.x to R510
R230.2	R3xx.x to R510
R230.3 (SIT patch must be installed on 32bit systems after R230.3 installation)	R400.8 to R511
R300.1	R400.8 to R515

QCS Compatibility

QCS Architecture Version	Experion PKS Layer	System Inventory Tool Release Support
RAE1xx	None	
RAE2xx	None	
RAE3xx	None	
RAE4xx	R101/201/210	No support
RAE5xx	R300/301/310/311	No support
R6xx	R 400.8	R300.1
R7xx	R5xx	R300.1

What is the System Inventory Tool and why is it needed?

Overview

The SIT provides a comprehensive system inventory documentation solution to support Honeywell's contract renewal process. The tool enables customers to complete their yearly contract renewal online through an automated system, better manage risk, prepare for any migrations, and ensure compliance and continuous evolution of their control system.

After the data is collected, it is uploaded to the System Inventory Tool portal, available at <https://process.honeywell.com>, go to your account and select System Inventory Portal as shown in the instructions in above.

The SIT collects asset data, which is then hosted in a secure Honeywell data center where the customer can view all their control system asset information (both hardware and software) through the System Inventory Portal. And, best of all, the tool is provided free of charge by Honeywell for all contracted and non-contracted sites and does not require an SESP contract or Assurance 360 service agreement.

Automated online contract renewals and more

The SIT was developed to support online contract renewals. Gone are the days of the laborious task of manually reviewing contract renewal worksheets, trying to track changes via emails and phone calls,

and providing results in a timely manner. No more lost notes or questions such as, “What did we do last year?” All updates and notes regarding asset quantities will be captured in the tool and carried forward year after year, making future contract renewals faster and easier.

But contract renewals are just once a year—what else can you do with the tool?

Better management of risks

With the SIT, users are able see all control system assets by each MSID in the Honeywell System Inventory Portal. With this view, product support status is shown for each asset. Do you know if your control system is using outdated equipment or assets, and is no longer supported by Honeywell? Finding answers like this is just a mouse click away in the portal.

When you can see all equipment in a single view via the online portal, you know exactly what hardware and software are running, what is outdated and where improvements could be made—thus better managing risk.

Compliance and continuous evolution of control systems

With the asset topology feature found in the System Inventory Portal, users have insight into the hardware components in each control system, thus avoiding lengthy delays to gather the right information when the system needs to be supported or expanded.

Today, control systems are more complex than ever before and there is limited information on how the different components need to interact. When the entire system can be visualized in one view, it increases awareness that leads to better decision-making.

Support for migrations

Customers have a budget for a migration, and in many cases, it's "use it or lose it." So, how will they know where best to invest in their control system?

As a user, can you quickly review every MSID design, topology, and product support status for every asset? If you've uploaded your inventory asset data file to the System Inventory Portal, all this and more are just a mouse click away. And did we mention it's free? That's right—Honeywell offers this to all our customers at no cost. No contract or service plan of any kind is required.

Quickly locate assets

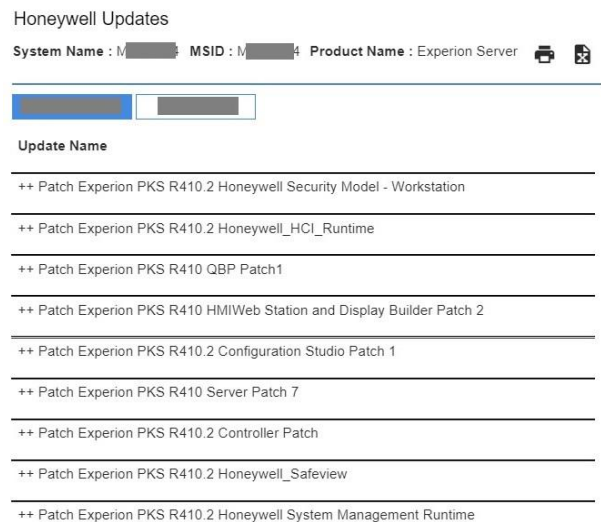

All assets are listed by Site > MSID and user-defined system names, and because each system name is assigned to its respective MSID, finding systems is easy—even if you don't know the MSID name.

What can collected asset data tell you?

Keeping track of the patches and updates installed on servers and stations can be a time-consuming task. It requires logging into each server or node and checking through the control panel to see which patches and updates have been installed.

Now, if you've run the SIT and uploaded an asset inventory file to the portal, just click on the server or console station and a complete list of all installed applications, patches and updates will be displayed in an easy-to-read table.

Need to find out which version of boot firmware is installed on a C300 controller? Just click on the MSID, select the controller and a table will display everything you need to know. Want even more

Honeywell Updates

System Name : M[redacted] MSID : M[redacted] Product Name : Experion Server

Update Name

++ Patch Experion PKS R410.2 Honeywell Security Model - Workstation
++ Patch Experion PKS R410.2 Honeywell_HCI_Runtime
++ Patch Experion PKS R410 QBP Patch1
++ Patch Experion PKS R410 HMIWeb Station and Display Builder Patch 2
++ Patch Experion PKS R410.2 Configuration Studio Patch 1
++ Patch Experion PKS R410 Server Patch 7
++ Patch Experion PKS R410.2 Controller Patch
++ Patch Experion PKS R410.2 Honeywell_Safeview
++ Patch Experion PKS R410.2 Honeywell System Management Runtime

flexibility? Export the data to an Excel spreadsheet and sort it or create a pivot table for convenient viewing.

What data does the tool collect?

The SIT is designed to capture details of the existing system hardware and software versions, including servers, stations, controllers, I/O modules, node details, installed applications, and switch models.

How can you view your data?

The System Inventory Portal allows customers and certain Honeywell account managers to see their account asset data. Within the portal, users can see all servers, stations, controllers, nodes, and switch hardware, as well as detailed information about each. Depending on which asset they're viewing, they can see the serial number, F/W, BIOS, installed software, support status, and much more.

To access the portal, go to honeywellprocess.com/support and login with the same credentials used when you registered.

Series C I/O

System Name : M-4 MSID : M-4

236IOLINK_1A	DI_HV_21	CC-PDIH01	21A	C	04.01.03	04.01.08	7

Not registered? No problem! Registration is free and takes less than a minute. Once you are registered, login and select the Support tab, then select the System Inventory tab.

Who can see your data?

All inventory data is viewable by only the customer, the customer's account manager, and Honeywell GTAC. In the event you call for support, GTAC can quickly obtain needed information such as F/W version, BIOS version, hardware rev, etc. No one else can ever see the data—not even other Honeywell employees.

What data is collected?

When you log into the System Inventory Portal, you will see a list of sites. Select a site and there are three icons: Licensed Software, Shipped Hardware, and Inventoried Assets.

Licensed Software	Shipped Hardware	Inventoried Assets
List of all licensed software shipped by Honeywell to the customer. Includes TPS BLDR, EBR, Experion PKS, GUS, PHD, and DOC 3000 licenses.	A complete list of every piece of hardware shipped by Honeywell to the customer, sorted by most recently shipped. Includes product part number, description, serial number, and date shipped.	Comprehensive list of all assets on each control system. Includes servers, stations, controllers, LCN nodes, and switches.

Note: Software releases not listed in the table are in “Phased Out” lifecycle status. The HPS Product Support Guide for Control, Safety and Monitoring Systems is available for download following link below

[HPS PRODUCT SUPPORT GUIDE FOR CONTROL, SAFETY AND MONITORING SYSTEMS](#)

Definitions:

“Software Package” means any HPS software product developed for the specific functional release of system software.

“Standalone Software” means any HPS software product developed for independent operation from a system software functional release.

“System Software” means machine-readable data and executable programs used to define the functionality of the HPS control system and standard hardware products, but does not include firmware, operating system, application software or other software products.
