# Sneak preview of the 2024 Global Honeywell Users Group theme

The 2024 Honeywell Users Group (HUG) theme AHEAD OF THE CURVE delineates leadership and forward thinking.

Honeywell and our annual HUG conference are focused on innovation and technological advancements that bring impactful outcomes to our customers.

AHEAD OF THE CURVE symbolizes our commitment to help customers achieve safer, more reliable, efficient and sustainable operations through a pioneering spirit and drive to shape the future.

Stay ahead of the curve, and stay updated here in HINTS.

Plus you can connect with your HUG steering committee – meet the 2024 Global HUG Steering Committee members:

# Introducing QCS SE (Standard Edition) R120

Honeywell QCS SE provides measurement and precise control for QCS applications targeted for OEM and end-users, who value compact and cost-effective solutions. It features open interfaces such as OPC UA, Modbus connectivity to external systems, REST-API based integration to IIoT/cloud, web-based displays, simple installation, cost-effective maintenance and service. The platform helps customers improve their operation efficiency and achieve high production quality.

QCS SE Release 120 follows the very successful R110 release that has been deployed globally in Gigafactories, on Tissue machines, and through our OEM partners. It offers several feature enhancements over R110, such as:

- Industry proven Cross Direction (CD) controls for Paper/Tissue and Lithium-Ion battery (LIB) applications.
- OPC UA client/server connectivity, and security improvements.
- As our flagship offering for Gigafactories, QCS SE 120 offers enhanced web displays for MD/CD Controls integrated to Battery MXP - Honeywell's advanced MES offering for the battery manufacturing industry.
- QCS SE 120 offers simple migration tools to migrate from earlier QCS SE releases and is the primary migration path for most MxProLine customers.

Please contact your Honeywell Account Manager or Technical Assistance team to know more about how QCS SE R120 can improve production performance or help migrate your existing legacy QCS system to latest release.

## Experion MX R720.2 Launch announcement

Experion MX provides superior visibility into the papermaking process while simplifying operations, improving productivity, reducing maintenance effort and service cost.

Experion MX R720.1, launched in June 2023, brought significant enhancements including improved system availability, control performance, virtualization capabilities, migration support, along with enhanced scanner reliability and sensor accuracy. This major release features included:

- Comprehensive Platform Refresh
- API Based Integration Support to third party applications.
- OPC UA Server for Data Access (Read/write for scalar, array, and partial array)
- Cyber Security Enhancements
- Browser based operator displays enhancement.
- Web Based Documentation
- Simplified Installation for Experion MX with integrated MD, CD Controls installer
- Simplified Migration Procedure and Tools from earlier releases to R720
- Compatibility with Experion PKS R520.2 and PMD 920.x
- Compatible MD and CD Controls for R720
- Support for New Dell 15G Platform

Experion MX R720.2, launching Dec 2023, brings added features over the prior release 720.1 which include-

- OPC UA client replacing HCILink (OPC DA Client)
- Enhanced security features such as packet encryption, CA certificate-based authentication
- New scanner 6022 support and sensor integration

Stay tuned for more exciting enhancements on Experion MX. Contact Honeywell Account Manager or Technical Assistance team to know more

## Safety Manager RUSIO Field Device Units end of sale

Safety Manager RUSIO Field Device Units, which are listed below, can no longer be ordered, and will therefore be withdrawn from sales starting from January 1st, 2024.

Model Number	Description
FC-RUSFDU-01	SM RIO system 32CH ST FX40Km ELD
FC-RUSFDU-02	SM RIO system 32CH 316L FX40Km T AT
FC-RUSFDU-03	RUSLS SYSTEM 32CH RED ST FX40KM ELD
FC-RUSFDU-04	RUSLS SYSTEM 32CH RED 316L FX40KM T
FC-RUSFDU-05	RUSIO SYSTEM 32CH ST FX40KM ELD
FC-RUSFDU-06	RUSIO SYSTEM 32CH 316L FX40KM T
FC-RUSFDU-07	RUSLS SYSTEM 32CH ST FX40KM ELD
FC-RUSFDU-08	RUSLS SYSTEM 32CH 316L FX40KM T

All above listed units will be supported in line with the Safety Manager product line and according to the HPS support policy.

The RUSFDU has been replaced by the Universal Safety Cabinet (USC). Please refer to the Safety Manager (SC) Universal Safety Cabinet Planning, Installation, and Service Guide. This document can be found and downloaded at [process.honeywell.com](http://process.honeywell.com) (sign in required).

### Questions & Contacts

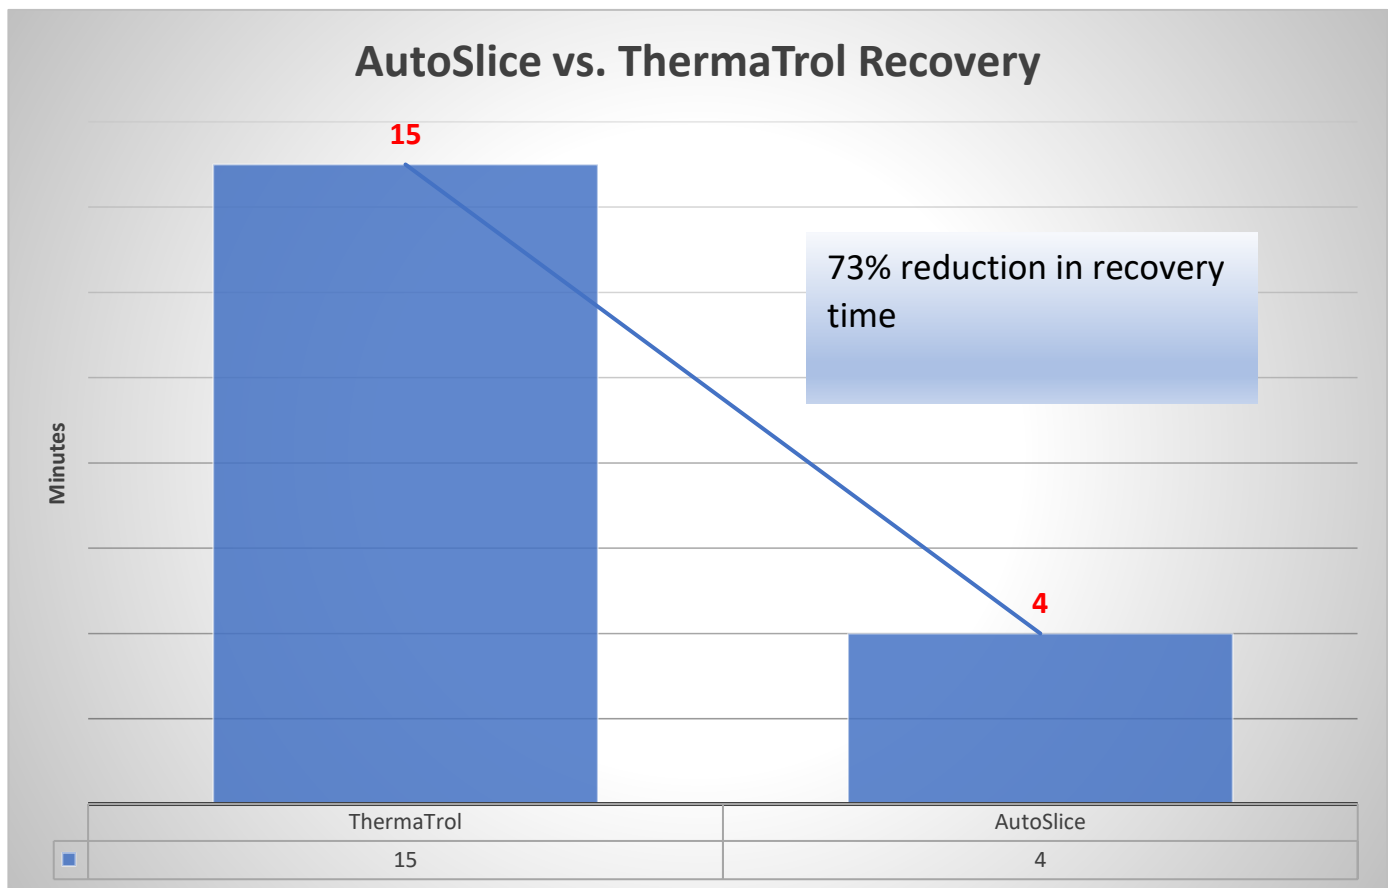

Should you have any further questions, do not hesitate to contact  
Honeywell Safety Management Systems  
Offering Management Safety System

## AutoSlice CDW passes twenty-year milestone with over 24,000 actuators deployed, providing superior Cross Directional control results.

Honeywell's AutoSlice™ system provides superior cross direction (CD) basis weight control through headbox slice lip automation. The narrowly spaced, intelligent actuators with their fast response and precise movement provide the tightest CD control.

### Key AutoSlice benefits

- CD profiling will reduce CD weight profile variability by 50-90% compared to manual, and 25-75% compared to other automatic controls
- 25-50% reduction in off-spec production due to CD weight variations
- Uniform CD weight profiles will provide for target shifting, yielding 1-2% fiber savings from downward target shifts, and 1-2% tonnage increase from upward target shifts
- CD profiling will reduce profile recovery time after start-ups, grade changes and process upsets by 25-50%
- Calendering and reel building will improve with up to a 50% reduction in CD moisture variability due to more even weight profiles

Customers have experienced recovery reductions up to 73% in time to get within CD weight specifications when replacing their ThermaTrol with AutoSlice, which converts to significant increase in production yield.

The AutoSlice CD Actuator provides an exceptional modernization path to customers that are still operating Phased-Out ThermaTrol slice lip actuators. While most sites have already migrated, all customers continuing to utilize ThermaTrol actuators should urgently plan modernization as many critical parts may no longer be available.

Your local Honeywell Account Team will be happy to assist with modernization planning.

## Tire Rubber Calender Thickness Measurement Installed

As announced in the August HINTS, Honeywell will soon launch a new, laser based, thickness measurement system for tire rubber calenders.

The first system, with five sensors, was recently installed at a tire plant in the United States, replacing a nearly 30-year old Honeywell system which could no longer be supported.

The sensors were installed, tested and commissioned over five days, and have been operating with a high degree of customer satisfaction.

With electric vehicles requiring tires with different specifications than those for combustion vehicles, tire manufacturers are continually having to optimize their production to meet new customer needs.

Honeywell's rubber thickness measurement, combined with our rubber calender controls, allows manufacturers to consistently meet their product specifications.

## Recommendation to use in house speed protection and surge protection devices for Turbo Applications: Guardian ODS and Guardian SDS by CCC

For Overspeed protection and Surge Detection requirements per API 670 standard, please use following CCC devices based on mounting requirements:

ODS-ASSY-001	Guardian ODS Overspeed Detection, Complete Assembly
ODS-ASSY-002	Guardian ODS, Overspeed Detection, Panel, AC/DC
ODS-ASSY-003	Guardian ODS, Overspeed Detection, Bulkhead, AC/AC
ODS-ASSY-004	Guardian ODS, Overspeed Detection, Panel, AC/AC
SDS-ASSY-001	Guardian SDS Surge Detection, HV/LV, Bulkhead
SDS-ASSY-002	Guardian SDS Surge Detection, Panel, AC/DC
SDS-ASSY-003	Guardian SDS Surge Detection, HV/HV, Bulkhead
SDS-ASSY-004	Guardian SDS Surge Detection, Panel AC/AC

### Product details:

The Guardian platform from CCC is a safety system specifically designed for the needs of rotating equipment. The Guardian Overspeed Detection System (ODS) monitors speed and acceleration, then uses a SIL-3 certified 2oo3 voting system to determine if the turbine or compressor is entering dangerous conditions and should be tripped offline.

Another Guardian platform is the Guardian Surge Detection System (SDS) monitors surge and overspeed within a single device. This unique offering can be configured to monitor a single compressor segment with 2oo3 voting at SIL-3 or up to 3 segments with 1oo1 detection at SIL-2.

- Three (3) independent, hot-swappable, speed monitoring modules with 2-out-of-3 voting
- Overspeed and acceleration detection
- IEC 61508 SIL-3 (Safety Integrated Level 3) certified
- API-670 and API-612 compliant
- Online testing and repair
- 12 millisecond response time for 0.5 to 80,000 rpm
- IP56 and IEC 721-3-3 1994 environmental class 3C2 rated
- Operating temperature of -20 to +60°C

For additional information, refer to <https://www.cccglobal.com/solutions/platforms/guardian/>

## ES-Assessment Announcement

We are announcing the Integrated Automation Assessment (IAA) and System Performance Baseline (SPB) services are being withdrawn from sale, effectively immediately.

Simultaneously, we are introducing a new assessment service for Experion® Process Knowledge System (PKS) and TotalPlant™ Solution (TPS). The new service, Enabled Services Assessment, is an upgraded service for surveying lifecycle, performance, and compliance to Honeywell's best practice configuration recommendations.

This new service will include additional checks and synch up with the latest GTAC documented audit checks that are not available in IAA. This service is designed to bring you quicker, more cost-effective, and actionable insights for your automation assets.

The new features include:

- More detailed lifecycle information down to the Experion patch/hotfix level
- 250+ security checks, including patching, AV status, and compliance to Experion security configuration guidelines
- More detailed network analysis, including FTE checks
- Additional server/client and TPS integration audit checks
- Detailed inventory capture for clients/servers, controllers, I/O, switches, etc.
- List of product notifications applicable to your inventory

## The Benefits of Honeywell's Enabled Services Assessment:

1. **Swift Results:** Say goodbye to waiting weeks for critical insights. Enabled Services Assessments leverage advanced automation to provide you with comprehensive system health results almost immediately after data upload.
2. **Cost Savings:** The Enabled Services Assessment not only delivers results faster, but also comes at a lower cost (\$15,000 USD per MSID) compared to the current IAA solution (\$17,365 USD per MSID).
3. **Automation at Its Best:** Our cutting-edge Unified Data Collector (UDC) ensures fully automated data collection, eliminating the need for manual intervention or onsite technicians.
4. **Actionable Insights:** An easy-to-read dashboard, powered by Enabled Services, provides you with an overall health scorecard and actionable recommendations vs. a 100+ page pdf document. The dashboard will be provided for a specific period of time with the ability to export all key information for follow-up actions.
5. **Proactive Maintenance:** Optimize expenditures and gain higher value from support services with the Enabled Services Assessment's proactive maintenance approach. Rather than spending time looking for problems with this automated assessment, you can spend time fixing problems.

To learn more about Enabled Services Assessment and how it can transform your automation operations, please contact your Honeywell Account Manager or Field Service leader.

## Honeywell Forge Worker Assist End of Sale

At Honeywell, we have always strived to provide you with the highest quality products and services. As part of our Honeywell Forge Workforce productivity Suite, Honeywell Forge Worker assist was released in August 2021 as a Honeywell cloud hosted SaaS product.

After careful consideration and in alignment with our strategy for commitment to innovation, and excellence, we have decided to End of Sale Honeywell Forge Worker Assist effective November 30th, 2023. While we believe in the value this offering provided, we are shifting our focus away from cloud-based collaboration tools and are not offering a replacement product.

We understand that transitions like these can raise questions, and we are here to help. If you have any questions, please reach out to GTAC (HPS Technical Support) or your account manager for more information.

## Forge Suite End of Sale Notification

Honeywell announces the End of Sale (EOS) of Forge Suite cybersecurity stand-alone software (Forge Suite Stand-alone Software) effective 12/31/2023. Detailed information for EOS product line affected by this notice is included in the attached table. For purposes of this notice, Forge Suite Stand-alone Software means the Forge Suite software developed for independent operation from other software products, all as more specifically identified in the tables below).

### Forge Suite Stand-alone Software End of Renewals

Renewal subscription licenses and additions to existing subscription licenses for the Forge Suite Stand-alone Software can continue for the remainder of 2023, provided that all such subscription licenses expire/terminate – without ability for renewal – provided the renewal period or subscription period for additional licenses ends (without opportunity for renewal) on or before the “End Of Life”, which is currently set for 12/31/2025.

### Product Transition Information

Clients should consider Cyber Insights as a replacement for Forge Site, and MSS remote access solution for Forge Core and Premium.

### Exhibit 1: Information Table

Affected products and components:

<b>Site Options</b>	
CS HFCCP-SI1-PLT60	HFCCP SITE PILOT 60 DAY
CS HFCCP-ASSET-PLT	HFCCP 25 ASSETS FOR ALL PILOTS

# Unified Data Collector – new inventory asset collector for 2023

The System Inventory Tool (SIT) data collector has been retired and replaced with the Unified Data Collector.

The Unified Data Collector (UDC) is the new method for inventory data collection for TPS and Experion systems. The Unified Data Collector, as the name implies, is a newer approach to combining Honeywell’s various data collection utilities into a single application. The UDC will over time be the single data collector for Asset Data Collection for online contract renewals, Enabled Services, Integrated Automation Assessments, System Performance Benchmarking, Preventative Maintenance Data Collection, and GTAC diagnostic data capture.

The Unified Data Collector is installed on an existing system at L3 or L2; it performs asset discovery and agents are deployed to collect the data from the various nodes. This server-based approach simplifies the inventory collection compared to the System Inventory Tool, which was required to be installed on each B Server.

The Unified Data Collector is available [here](#) (after clicking link, login to download).

The screenshot shows the Honeywell Technical Publications website. The top navigation bar includes the Honeywell logo and links for INDUSTRIES, PRODUCTS, SERVICES, SOLUTIONS, SUPPORT, and NEWS & EVENTS. Below the navigation is a breadcrumb trail: Home > Technical Publications. The main heading is 'Technical Publications'. There are tabs for 'Search', 'Favorites', and 'Saved Searches'. A search bar contains the text 'Unified Data Collector for Inventory Collection R130.1'. Below the search bar, it indicates 'Showing search results for "Unified Data Collector for Inventory Collection R130.1"'. There are buttons for 'START OVER' and 'Sort by Relevance'. On the left, there are filter sections for 'PRODUCT FAMILY' and 'DOCUMENT TYPE'. The main content area displays two search results:

- UNIFIED DATA COLLECTOR FOR INVENTORY COLLECTION R130.1**  
Summary: This guide explains the System Inventory Tool (SIT) integration with Unified Data Collector.  
Actions: SHARE, ADD TO FAVORITES, DOWNLOAD, PREVIEW
- UNIFIED DATA COLLECTOR INSTALLATION AND CONFIGURATION GUIDE R130.1**  
Summary: This guide describes detailed information on the installation, setup, and maintenance of the Unified Data Collector product site.  
Actions: SHARE, ADD TO FAVORITES, DOWNLOAD, PREVIEW

Definitions:

“Software Package” means any HPS software product developed for the specific functional release of system software.

“Standalone Software” means any HPS software product developed for independent operation from a system software functional release.

“System Software” means machine-readable data and executable programs used to define the functionality of the HPS control system and standard hardware products, but does not include firmware, operating system, application software or other software products.

“SaaS Offering” means any HPS software product which applications are hosted through the cloud and made available to end users over the internet.
