GLOBAL HONEYWELL ACADEMY TRAINING SOLUTIONS

What's inside?

- Training Needs Assessment
- New Cybersecurity Training Offering

Training Needs Assessment (TNA)

Training Needs Assessment is the first step to developing a competent workforce using intelligent industrial operations and allows our customers to evaluate the knowledge of assessment takers against key areas of EPKS, SM, SM-SC, UOC, and FDM designed for Industry wide Technician persona.

Training Needs Assessment expands Training Needs Assessment (TNA) coverage by adding knowledge of assessment takers against key areas of Honeywell Systems, TPS, Networking, Virtualization, PHD, APC, CPM, QCS, Dynamo and OTS designed for Industry wide Technician, Operator, Engineer and Administrator persona.

Training Needs Assessment is designed to identify appropriate learning interventions and to address and close any identified gaps in product and role-based knowledge and skills.

Deliverables:

- Comprehensive TNA report
- Individual TNA report (participant wise)
- Organizational Report (organization wise)
- Competency Development Plan

For any inquiries, please reach out to:

- BTI Leader: Manas Dutta
- Honeywell Global Academy Director: Abhijit Gawade
- Honeywell Academy: APAC - Mini Goyal, EMEA - Shrikant Kamble, AMER - Nerio Gutierrez
- Offering Manager: Swati Agarwal

New Cybersecurity Training Offering: Asynchronous Training (AT)

1. CS-0004-AT: Cybersecurity: Fundamentals - Industrial Control Systems (ICS) Cybersecurity Awareness

- Introduction to cybersecurity challenges facing process plants and critical infrastructure.
- Introduces the importance of securing control systems from cyber-attacks and concepts for implementing mitigation strategies.

Please [click here](#) for course info, schedules, and request to enroll.

2024 Global Honeywell Users Group (HUG) Conference

The 47th annual HUG will be held in Madrid, Spain on June 10-13, 2024

For the 2024 Global HUG Steering Committee, EMEA representatives will have their first face-to-face meeting to start to prepare agenda items in October this year.

We will be looking to start the call for customer presentation papers in January 2024, and the accompanying abstracts for these will need to be submitted before April 1. The Steering Committee will review all submitted abstracts to see if they will be of interest for the HUG audience. Then the committee will follow up on acceptance and invite the end user customer presenters.

If you submit an industry paper based on your HPS, UOP, SME, HCE, HCI, Cyber or other related Honeywell solutions or services, including lessons learned, and your paper is accepted, your 2024 HUG Conference registration fee will be waived.

The 2024 HUG Conference registration fees, and what these include, will be listed on our website during the beginning of December.

WANTED: NEW HUG CUSTOMER STEERING COMMITTEE MEMBERS

We may be looking for you! In the most ideal situation:

- You have attended at least one or multiple HUGs, and
- You have previously presented, and
- You are not afraid to represent your company and your industry, and
- On top of all this, you will have the full support of your company and leadership team to join us at our annual face-to-face conference.

Typically, the HUG Steering Committee has a monthly one-hour call, we meet in the fall in-person for one full day, and you need to be present the entire HUG week.

We need you and your company to consider stepping in for a minimum of three years. You cannot already be in a committee or on a board with one of our conference competitors. Your company needs to bear your travel, accommodation and other costs accrued. We do waive your conference registration fees at any HPS-HUG Conference you plan to attend.

How to indicate you are available:

If the above has your interest, please drop us an email at: usersgroup@honeywell.com with the subject line: STEERING COMMITTEE MEMBER interest. Please also include your bio description, your picture, and a short statement on why you believe you should be on the HUG Conference Steering Committee.

We already have a full Oil and Gas house, but we are looking for new members in the following industry categories:

- Utilities
- Terminal
- Upstream
- Minerals, Mining and Metals
- Life sciences

Based on your submission, the Steering Committee members review your application, and the Chair and Vice Chair will interview you. Then they will explain the next step and can answer you any questions you may have.

If you'd like more information, please contact: usersgroup@honeywell.com

We look forward hearing from you, your peers and to see you at the 2024 HUG in Madrid this June. Feel free to stay posted here in HINTS and/or start following #HPSHUG24.

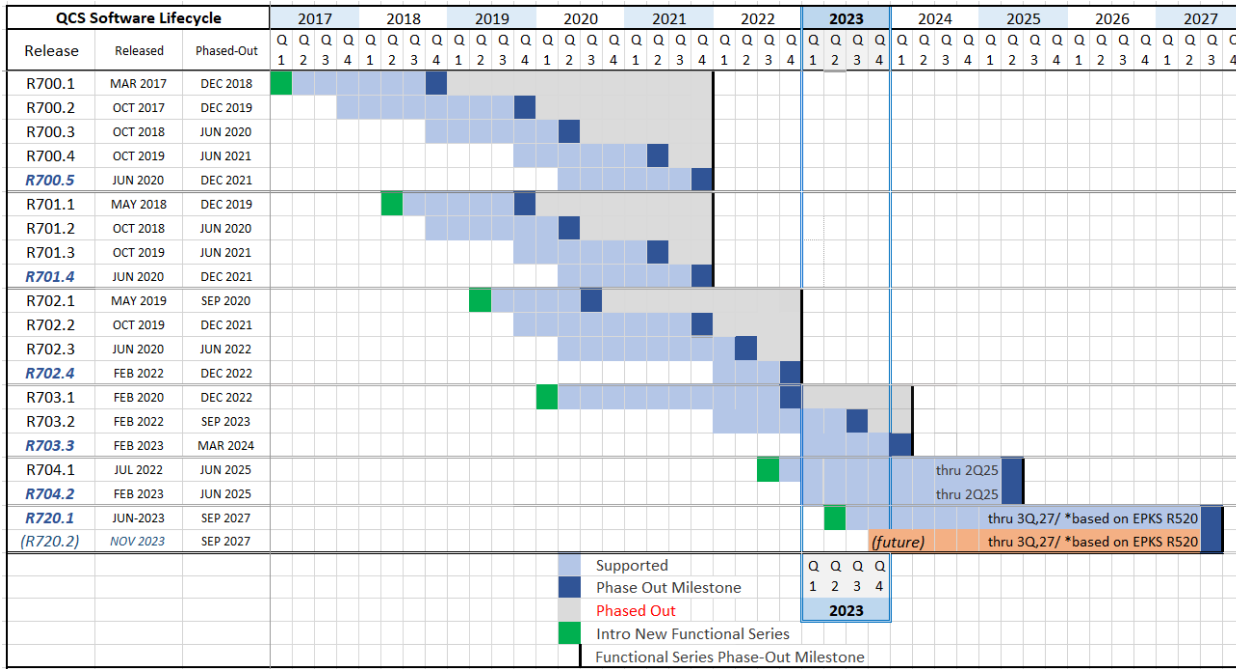

Sheet Manufacturing & Gigafactory

Experion MX Software Support Guidelines

Experion MX (QCS) Lifecycle support document is refreshed with updated information on current software release number and dates. The document also provides guidance on old unsupported releases with respective phase-out dates.

The current latest Experion MX software version is 720.1, launched in June 2023, with planned update to 720.2 in November 2023.

Notice to all R703.x users, which is approaching Phase-Out milestone on March 31, 2024. We recommend all projects to adopt R720.x for longest lifecycle support...

Experion MX Release Support Status Timeline

More information can be found in latest knowledge article published on HPS Support site and GTAC support document for QCS:

https://process.honeywell.com/us/en/secure/services-and-support/support-center/technical-support/technical-solutions/article-detail.ka_000135113

QCS 4.0 R500.1 New Features

QCS 4.0 receives regular updates to improve its ability to monitor Quality Control System performance and system health. The August R500.1 update added the following:

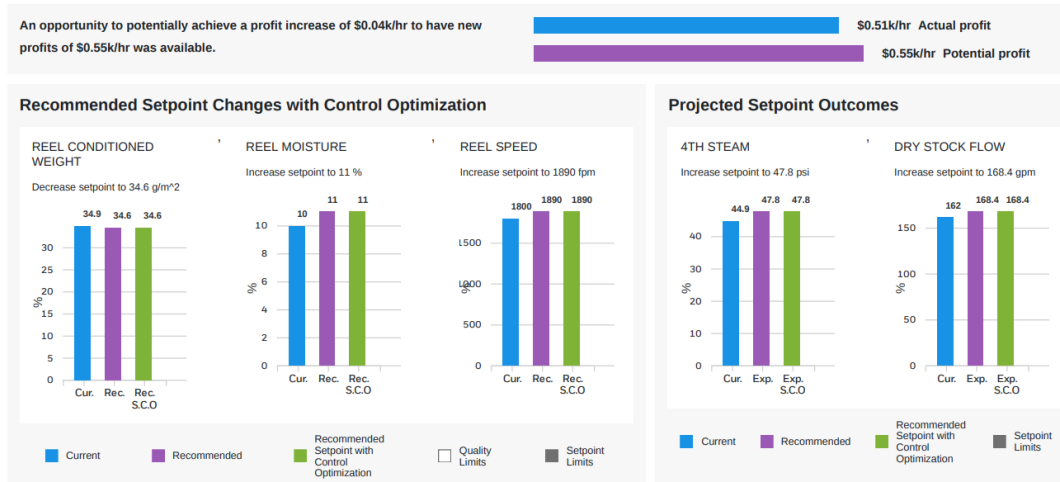

1. It is now possible to add Optimization Potential to the Monthly Report Summary page. This summarizes opportunities to improve production profits by optimizing supervisory controls to reduce costs, or increase production, based on the last month's operating data.

Optimization Potential

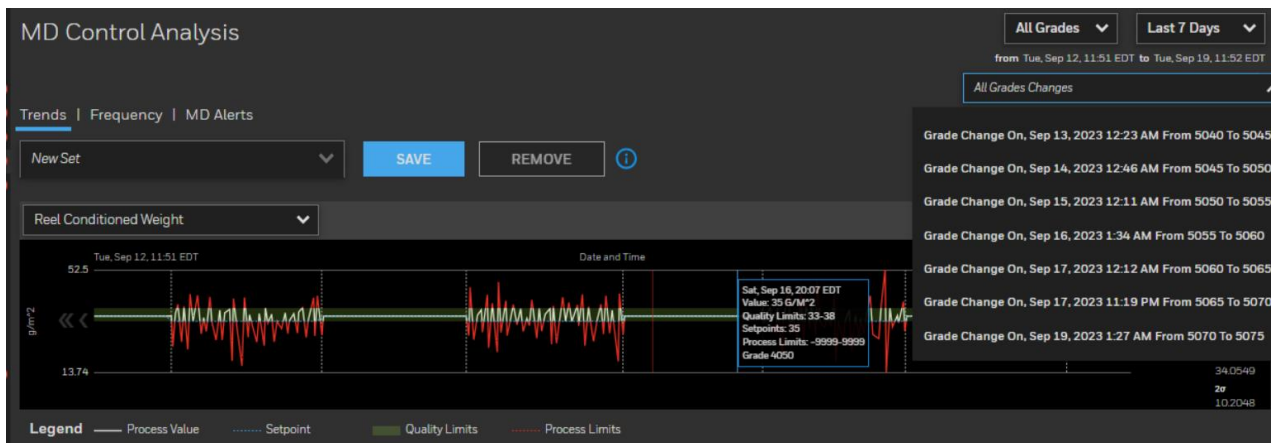

Below are identified setpoint changes that could have been applied this month.

Optimization potential identified for

Grade 5030 Date 06/07/2023

2. Grade change analysis has been improved by adding auto-detection of grade transitions on the Trends and Machine Direction control displays. Detected grade transitions are captured in a pull-down menu. When a transition is selected, trend plots will automatically display data from one hour before, and one hour after the transition.

3. Users can now select a dark mode for displays to suit their viewing preference.
4. Interframe alignment tracking is available for systems with multiple scanners. Alignment values are logged and can be visualized on Trends. This paves the way for automatic alerting of scanner misalignment.

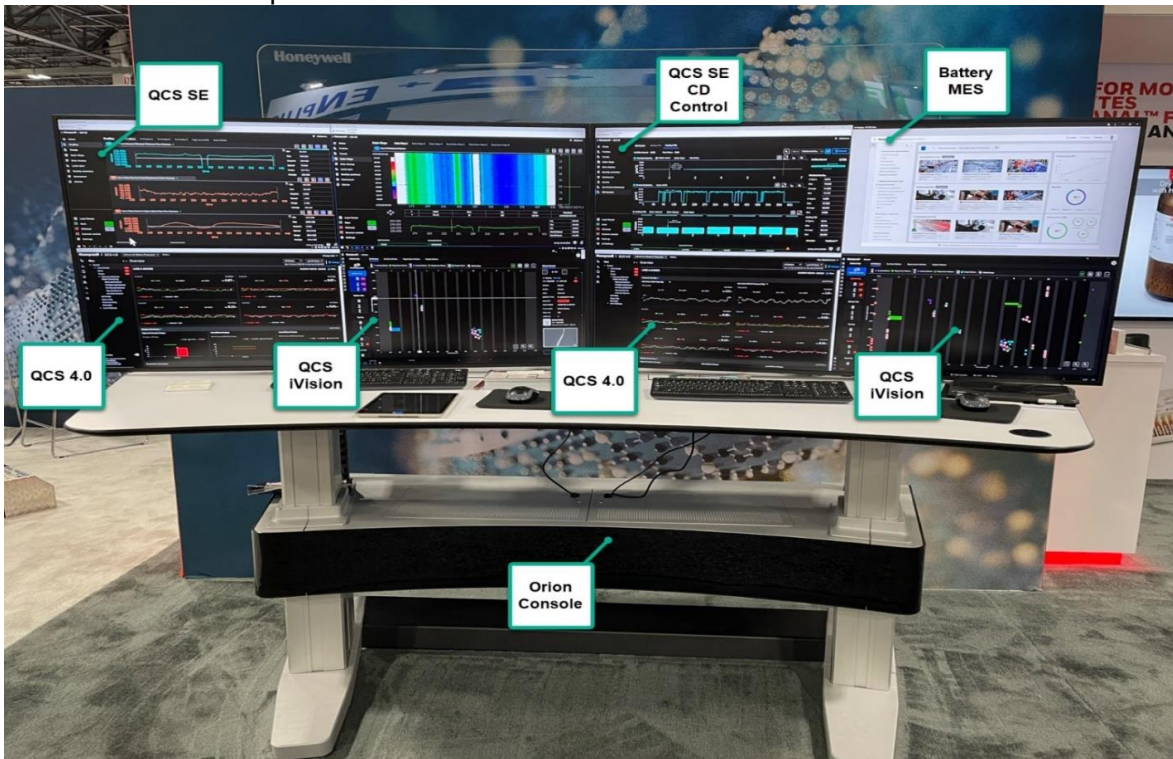

5. Support for non-measurement virtual I/O (VIO) such as analog inputs or remote controller status. All VIO configured on the QCS are included automatically when the system is onboarded to QCS 4.0. If enabled, they can be trended and analyzed using Fast Fourier Transforms (FFT).
6. Users can save their own sets of trends & profiles for each QCS being monitored. Selected time periods, profiles, trends, filters, and sorting are persistent throughout the user's session.
7. Eleven new demo videos have been added to the online Training Materials to help users become familiar with working in QCS 4.0 and learning its features.

Battery Show USA 2023

We had very successful exhibition at the US Battery Show, held between September 12th to 14th in Michigan, with below key highlights. Great teamwork!

- Held over 3 days and attracted over 15000+ attendees from EV OEMs, cell producers, machinery OEMs and many other potential partners in this industry.
- Tremendous growth predicted in North America with infrastructure spending on raw materials processing and cell production
- One Honeywell participation from PMT-HPS, PMT-AM, HBT and SPS business attracting over 400+ booth visitors. Great traffic at booth; the Honeywell brand is a big draw!
- LIVE demo at our booth: LIB Optical Caliper System, Orion console was setup with QCS SE, QCS 4.0 and Battery Manufacturing excellence system and iVision web inspection system displays, ProFlow FT actuators
- One Honeywell exhibits included Li-Ion Tamer, Advance material- Hydranal FA-Reagents for LIB, Safety and Productivity Solutions (SPS)-Electric Vehicle industry PPE, SPS- Electric Vehicle demo pod

Orion Console setup with live demo:

Honeywell Booth exhibits overview:

ES-Assessment Announcement

We are announcing the Integrated Automation Assessment (IAA) and System Performance Baseline (SPB) services are being withdrawn from sale, effectively immediately.

Simultaneously, we are introducing a new assessment service for Experion® Process Knowledge System (PKS) and TotalPlant™ Solution (TPS). The new service, Enabled Services Assessment, is an upgraded service for surveying lifecycle, performance, and compliance to Honeywell's best practice configuration recommendations.

This new service will include additional checks and synch up with the latest GTAC documented audit checks that are not available in IAA. This service is designed to bring you quicker, more cost-effective, and actionable insights for your automation assets.

The new features include:

- More detailed lifecycle information down to the Experion patch/hotfix level
- 250+ security checks, including patching, AV status, and compliance to Experion security configuration guidelines
- More detailed network analysis, including FTE checks
- Additional server/client and TPS integration audit checks
- Detailed inventory capture for clients/servers, controllers, I/O, switches, etc.
- List of product notifications applicable to your inventory

The Benefits of Honeywell's Enabled Services Assessment:

1. **Swift Results:** Say goodbye to waiting weeks for critical insights. Enabled Services Assessments leverage advanced automation to provide you with comprehensive system health results almost immediately after data upload.
2. **Cost Savings:** The Enabled Services Assessment not only delivers results faster, but also comes at a lower cost (\$15,000 USD per MSID) compared to the current IAA solution (\$17,365 USD per MSID).
3. **Automation at Its Best:** Our cutting-edge Unified Data Collector (UDC) ensures fully automated data collection, eliminating the need for manual intervention or onsite technicians.
4. **Actionable Insights:** An easy-to-read dashboard, powered by Enabled Services, provides you with an overall health scorecard and actionable recommendations vs. a 100+ page pdf document. The dashboard will be provided for a specific period of time with the ability to export all key information for follow-up actions.
5. **Proactive Maintenance:** Optimize expenditures and gain higher value from support services with the Enabled Services Assessment's proactive maintenance approach. Rather than spending time looking for problems with this automated assessment, you can spend time fixing problems.

To learn more about Enabled Services Assessment and how it can transform your automation operations, please contact your Honeywell Account Manager or Field Service leader.

Premium Platform Gen3 2-Node Direct Connect Release Announcement

Honeywell continues to invest in expanding virtualization platform solutions to provide the latest updates in virtualization technology to systems of all sizes and configurations. The latest Premium Platform Gen3 2-Node Direct Connect solution is now qualified and available for ordering, and it provides technologies such as VMware vMotion, VMware High Availability, and simplified deployment and management tools in a configuration which has been optimized for smaller systems. This solution provides features such as automatic virtual machine recovery and non-disruptive maintenance in a cost effective, two-server package with reduced networking and hardware requirements.

The Premium Platform Gen3 2-Node Direct Connect solution is specifically engineered for use with Experion PKS and provides a turnkey solution for modern virtualization technologies. With detailed documentation available exclusively from Honeywell, automated deployment wizards, and curated system updates, this platform delivers advanced VMware vSphere and vSAN features and benefits for systems with smaller node counts.

Detailed specifications, model numbers, and product information is available in the [HPS Virtualization Specification](#).

TPS Builder End of Sale Announcement

At Honeywell, we have always strived to provide you with the highest quality products and services. As part of committed roadmap to modernize TPS Systems, we launched Experion Unified Engineering Tools (UET) with Experion R511.3 with functions and features to build points for TPS / EUCN nodes such as AM and EHPM and have continued it with updates for EHPMX and C300PM using Experion Control Builder in later releases. This development paved the path for more development in this direction to make UET a replacement of the aging TPS Builder Tool.

After careful consideration and in alignment with our commitment to cyber security, innovation, and excellence, we have decided to transition the TPS Builder to End of Sale Status effective October 1st, 2023.

The following product model numbers and their associated kits/licenses will be transitioned to End of Sale.

Product	Product Description
TP-BSU000-xxx	TPS BUILDER BASE INITIAL COPY
TP-BSU001-xxx	TPS BUILDER BASE ADDITIONAL COPY
TP-BSU010-xxx	TPS BUILDER UPDATE: NON SESP WITHIN RELEASE
TP-BSU011-xxx	TPS BUILDER UPDATE: 2XX TO Rxxx
TP-BSU020-xxx	TPS BUILDER BASE INITIAL UPGRADE
TP-BSU021-xxx	TPS BUILDER BASE ADDL UPGRADE
TP-BCD000-xxx	TPS BUILDER CONTROL DWG EXPORT TO GUS Picture Editor
TP-BDT000-xxx	TPS BUILDER DATA TRANSFER FOR TPS BUILDER
TP-BHD001-xxx	TPS BUILDER HG/DATA HIWAY LIB ADDN'L
TP-BLU000-xxx	TPS BUILDER LCN/UCN LIBRARY
TP-BLU001-xxx	TPS BUILDER LCN/UCN LIBRARY ADDITIONAL
TP-BDRxxx	MEDIA KIT TPS BUILDER Rxxx

Note: xxx stands for the release number.

The latest releases TPS Builder R430 and R440 (released as limited distribution release) are part of this End of Sale announcement.

What Does This Mean for You?

1. End of Sale Date: October 1st, 2023, will mark the last day on which TPS Builder will be available for purchase. No new orders for this product will be accepted after this date.
2. End of Support: Following the End of Sale, our support for TPS Builder will continue as usual until December 31st, 2025. This date is in line with “End of Support” for coax UCN/LCN products. After this date, we will no longer provide software updates, security patches, or technical support for this product.
3. Upcoming Solutions: While we are announcing End of Sale to TPS Builder, we have launched an alternative solution – “Experion Unified Engineering Tools”, which offers functions and features for Point building for AM/HPM/EHPM/EHPMX/C300PM. We are actively working to introduce new and innovative refinements to these tools in upcoming Experion releases and will continue to add functionality that would enable our customers to transition to UET.

We understand that transitions like these can raise questions, and we are here to help.

For details on the latest product support policy, please reach out to GTAC (HPS Technical Support). Customers with active and paid service and support contracts, are requested to contact their respective Account Managers or Honeywell’s Global Support team for additional information.

Legacy ICON, Z, EZ and Classic Furniture Phase Out

Legacy ICON, Z, EZ and Classic furniture product lines support status will transition to phased out on the 1st October 2023. No parts or support will be available after this date.

Recycled parts may be available on a best-efforts basis.

All new installation projects should use Honeywell’s state of the art Orion Console. This information was originally communicated in October 2016 HINTS. For more details, please contact your account representative or system consultant.

Model Numbers Affected

ICON FURNITURE

<i>Model Number</i>	<i>Description</i>

MP-FHSN02	Classic Lower Bay, Full Upper, FPD Plate, Gray/ Beige
MP-FHSN03	Classic Lower Bay, Full Upper, FPD Plate, Gray/Black
TP-PCMCF1	Experion Station Fixed Mounting Kit For Classic
TP-PCMCS1	Experion Station Sliding Mounting Kit For Classic
MP-EENT01	Power Entry, 115VAC, 15A, 6 - Twistlock Plugs
MP-MMEP03	Classic Half Upper Tier Blank Face

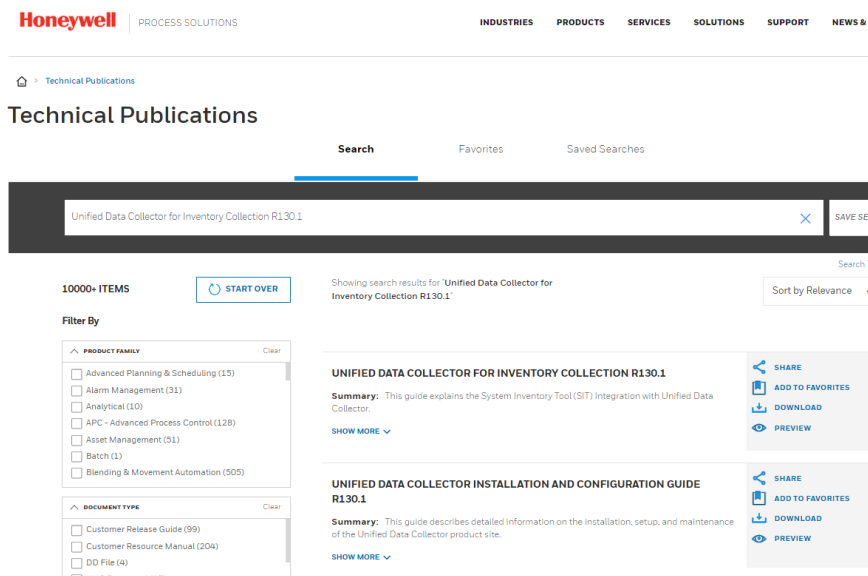

Unified Data Collector – new inventory asset collector for 2023

The System Inventory Tool (SIT) data collector has been retired and replaced with the Unified Data Collector.

The Unified Data Collector (UDC) is the new method for inventory data collection for TPS and Experion systems. The Unified Data Collector, as the name implies, is a newer approach to combining Honeywell’s various data collection utilities into a single application. The UDC will over time be the single data collector for Asset Data Collection for online contract renewals, Enabled Services, Integrated Automation Assessments, System Performance Benchmarking, Preventative Maintenance Data Collection, and GTAC diagnostic data capture.

The Unified Data Collector is installed on an existing system at L3 or L2; it performs asset discovery and agents are deployed to collect the data from the various nodes. This server-based approach simplifies the inventory collection compared to the System Inventory Tool, which was required to be installed on each B Server.

The Unified Data Collector is available [here](#) (after clicking link, login to download).

Note: Software releases not listed in the table are in “Phased Out” lifecycle status. The HPS Product Support Guide for Control, Safety and Monitoring Systems is available for download following link below (Requires Login)

<https://process.honeywell.com/us/en/support/technical-publication?search=product%2520support%2520guide%2520for%2520control%2520safety%2520and%2520monitoring%2520systems>

Definitions:

“Software Package” means any HPS software product developed for the specific functional release of system software.

“Standalone Software” means any HPS software product developed for independent operation from a system software functional release.

“System Software” means machine-readable data and executable programs used to define the functionality of the HPS control system and standard hardware products, but does not include firmware, operating system, application software or other software products.

“SaaS Offering” means any HPS software product which applications are hosted through the cloud and made available to end users over the internet.
