NOVEMBER 2024

# MONTHLY SYSTEM HINTS NEWSLETTER

The Honeywell Information, News and Tips (HINTS) monthly newsletter covers timely issues ranging from Honeywell Users Group and cybersecurity, to Priority Notifications, product releases and updates and more.

To access and subscribe to HINTS newsletter go to

<https://process.honeywell.com/us/en/support/support-newsletters>

where you can consult previous releases and be notified about latest publication (after you are subscribed to).

## Honeywell Users Group (HUG) news

“Save the Date” for the 2025 Honeywell Users Group Americas  
The 2025 Honeywell Users Group (HUG) Americas will be held from June 9-11 at the JW Marriott Country Hills Resort, San Antonio, Texas, USA.

This year's 49<sup>th</sup> annual symposium will focus on the theme:

EMPOWERING CHANGE  
SECURING TOMORROW

The 2025 HUG theme highlights our collaborative commitment to driving impactful changes in the industry.

By leveraging AI and autonomous systems, enhancing cybersecurity, and digitally connected services, we aim to empower users with cutting-edge technologies.

This focus frames our dedication to transformative AI-driven solutions and proactive cybersecurity measures, ensuring a secure and sustainable future for all.

Join us as we explore how to harness the power of change and pave the way for a sustainable future.

NOTE: The 35<sup>th</sup> annual 2025 Honeywell Users Group EMEA dates and venue are not confirmed yet, we will keep you posted here.

### Prepare for Your 2025 HUG Attendance

For your 2025 HUG personal attendance, whether for the Americas or EMEA, be sure to check with your Honeywell contact or Account Manager about utilizing your [Solution Enhancement Support Program \(SESP\) Training Match Fund \(TMF\)](#).

If your company is enrolled, consider using the TMF to cover your HUG conference registration fee. Alternatively, you can use your A360 HUG passes if they are included in your company's contract with Honeywell Process Solutions.

If neither option is available, you can still participate in HUG by paying the conference registration fee with a credit card.

HUG Americas customer registration will open on March 10, 2025.

All details regarding deadlines, and pricing will become available on [the website](#).

Warm regards,  
Your HUG Organizational team.

# GLOBAL HONEYWELL ACADEMY

## TRAINING SOLUTIONS

November 2024

Welcome to the November edition of “Global Honeywell Academy Training Solutions”. As always, we are excited to share the latest updates, insights, and innovations from Honeywell that we believe will add value to you.

## HONEYWELL ACADEMY IS REGISTERED AS TRAINING VENDOR UNDER HRDC

Honeywell Academy is now registered training vendor under HRDC, and authorized to provide training as per HRDC policies. Honeywell, in partnership with HRDC Malaysia, pleased to offer exclusive training programs designed to equip you with the knowledge and expertise essential for success in today’s competitive market.

HRD Corp manages the “Human Resources Development Fund” (HRDF) in Malaysia, operating under the Malaysian Ministry of Human Resources. HRDC is a financial pool dedicated to supporting and empowering Human Resource development in the country. Its primary purpose is to provide financial assistance to employers for their employees’ training and skill development, helping to address performance gaps.

Employers under the HRDC scheme are eligible to receive grants from the fund to spend on employee training programs. These grants can cover a significant portion, if not all, of the expenses incurred in organizing such training. HRDC also provides financial aid to employers who are organizing these trainings.

For more information or registration please write to [hps-training-apac@honeywell.com](mailto:hps-training-apac@honeywell.com)

Warm regards,

**HONEYWELL ACADEMY**

# PRODUCTS HIGHLIGHTS

## Safety Manager R162.12

Safety Manager software release R162.12 has been released and is available for shipment. This release provides improvements and overall maintenance to the product.

Key functionalities supported by Safety Manager R162.12 are:

- TÜV SIL3 approved FSC Controller to Safety Manager Controller migration
- Support of FSC IO modules
- FSC specific functionalities to support migration:
  - Annunciator
  - PID
  - SensAI
  - Functional Logic Diagram Symbol library 2 (Portrait mode: SYM2)
- EUCN integration with TPS
- Universal Safety IO Earth Leakage Detection
- First Contact via Ethernet (BootP)
- TÜV SIL2 certified communication with AutoSafe Fire & Gas panel

More details about the new features and improvements can be found in the R162.12 Software Change notice (SCN). This document can be found [here](#) (sign in required).

Current users of Safety Manager are advised to upgrade to R162.12 or at least use a supported software version. The status of the various Safety Manager software releases is available in the Safety System Software Support Guidelines. This document can be found at the Honeywell Process Solutions support portal: <https://process.honeywell.com/us/en/home> (sign is required).

## Production Management | Intuition Forms

This communication is intended for the existing customers that have Honeywell Intuition Forms® product line application installed and running in one or more of their sites.

### Key Details:

- Product Affected: Honeywell Intuition Forms® (last available release: R200.5)
- End-of-Life Date: The latest release of Intuition Forms product will be phased out of support effective 31st December 2025
- Impact: No further technical support, updates, or patches will be provided after this date.

### What This Means for You:

- Support: Your current installations will remain functional, but support will end after December 31, 2025.
- Please login to our support website <https://process.honeywell.com/> for details on latest support policy.

Customers with active and paid service and support contracts, are requested to contact their respective account managers or Honeywell's Global Support team for additional information.

Thank you for your continued partnership.

## SESP Program Update: Adding Digital Systems Insights

In Honeywell's ongoing commitment to deliver value-added innovation and new solutions, we are pleased to announce the introduction of Digital Systems Insights as a new entitlement to the Solution Enhancement Support Program (SESP). This initiative aims to enhance your overall experience by providing more comprehensive capabilities that will reduce your overall cost of ownership and streamline your control system support and maintenance efforts.

### Introducing Digital Systems Insights to Simplify System Support

In today's fast-paced digital landscape, efficient and proactive technical support is crucial for maintaining seamless operations. We are excited to introduce Digital Systems Insights, a groundbreaking solution that transforms your control system support and maintenance.

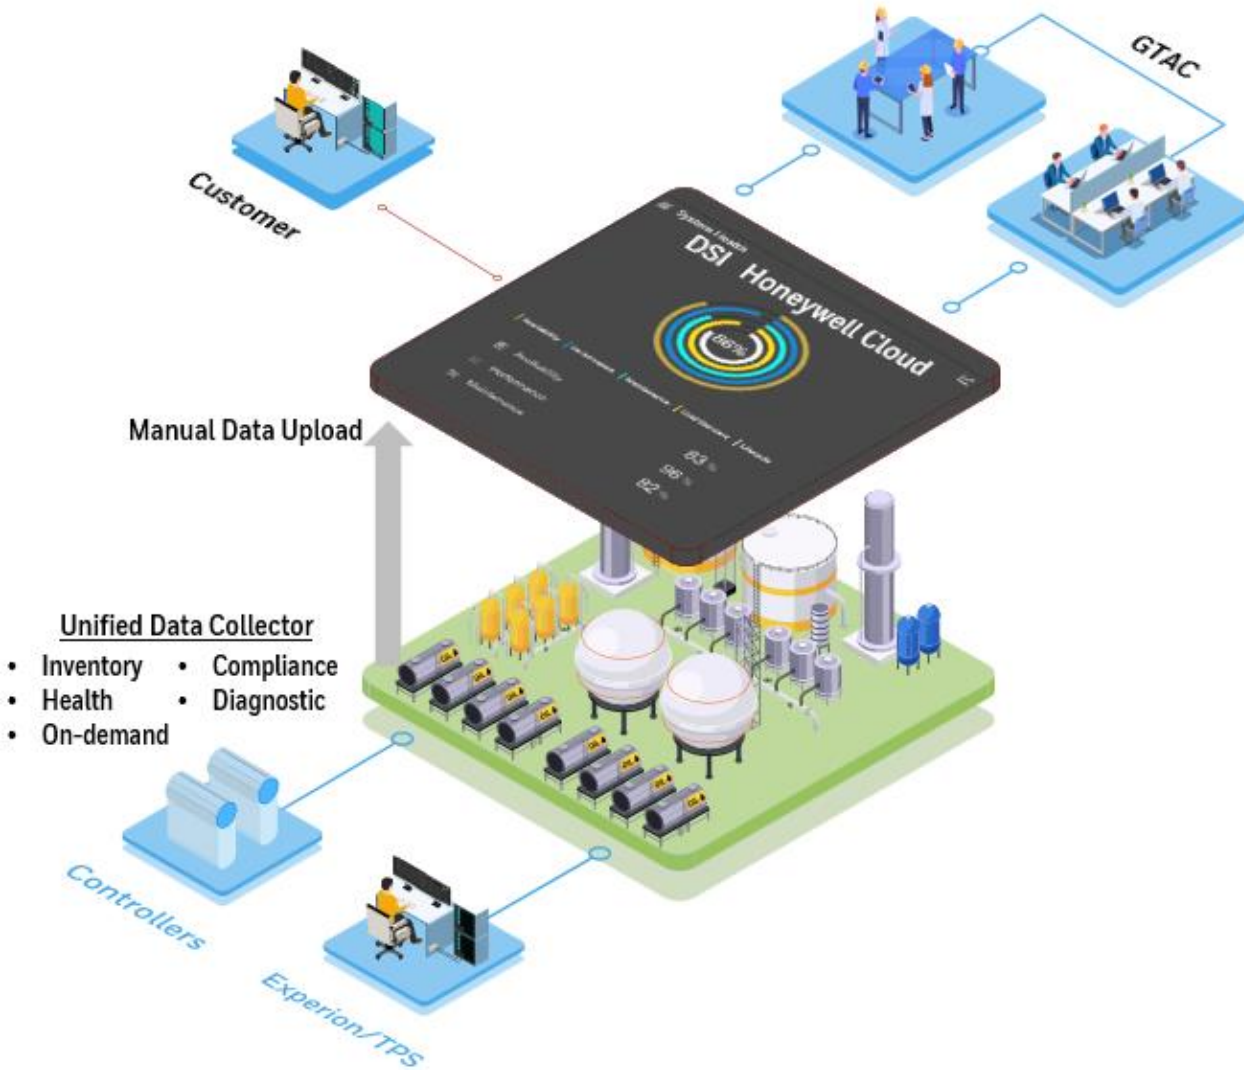

Digital Systems Insights empowers you with:

- **Up-to-date Inventory Intelligence:** Gain access to accurate and up-to-date inventory information whenever you need it. No more outdated reports or questions about what you have installed.
- **Lifecycle Visibility:** Stay ahead of the curve with instant access to the support life cycle details for your installed software and hardware on your Honeywell control system assets.
- **Streamlined Support Engagement:** Experience a new level of efficiency when engaging with our Global Technical Assistance Center (GTAC). Digital Systems Insights will facilitate the sharing of key diagnostic information required by GTAC to streamline your support and help resolve cases faster.
- **AI-Powered Self-Service Assistance (future add):** In 2025, we will introduce an AI powered query capability that searches through all published knowledge articles and technical publications. This intelligent search feature will enable a self-serve capability, putting the power of our entire knowledge base at your fingertips.

- Digital Systems Insights Solution Overview

Digital Systems Insights is enabled by the Unified Data Collector (UDC), a replacement for the System Inventory Tool (SIT) which will be installed on-site. The UDC data is uploaded into Honeywell’s Digital Systems Insights system, where you will have access to upload data, view your inventory and lifecycle information. UDC can be run ‘on-demand’ as necessary to collect updated inventory information whenever required, and if a problem occurs, it can be run to partially collect the necessary GTAC checks and diagnostic information.

By leveraging cutting-edge technology, automation, and artificial intelligence, Digital Systems Insights eliminates traditional pain points in technical support, allowing you to focus on what matters most – driving your business forward.

# SHEET MANUFACTURING & GIGA FACTORY

## Sheet Manufacturing: Open and Closed End Wide Scanner released.

The Model 6022 scanner is an innovative inline system to measure Basis Weight, Thickness and % Moisture of a wide moving web (~11 meters) in flat sheet manufacturing industries, leveraging proven mechanical systems for the frame and head drive to ensure reliability and performance.

**Model 6022-54, Closed end O-Frame scanner with dual sensor head**

**Model 6022-64, Open end O-Frame scanner with single sensor head**

The model 6022 provides accurate and reliable fast-scanning performance for continuous sheet processes. This scanner includes the Precision Measurement Processor (PMP) at the end bell, providing LAN communications with QCS SE System. The scanner's I-beam structure and stable measurement platform maintain precise sensor alignment, for fast measurement with superior accuracy.

The 6022 scanner features fully modernized, Ethernet-based sensor communication. This allows for comprehensive process measurement data to be acquired and transmitted to the control system, enhancing operational efficiency through Machine and Cross direction controls.

## Backscatter X-Ray Scanner For Tire Rubber Calenders Released

The model 6030 Backscatter X-Ray Scanner measures the weight of the bottom rubber ply entering a tire calender. This measurement is used to enable rapid calender start-ups and product specification changes with minimal production losses. The scanning weight measurement can be combined with fixed-point thickness measurements, post-calender scanning total weight measurement, and a suite of machine direction controls to provide a comprehensive tire rubber calender control package.

With this release, the model 2030 Backscatter X-Ray Scanner will transition to Phased Out due to critical data acquisition cards no longer being available. Please contact your Honeywell Account or Service Manager to discuss how to best ensure ongoing support of your tire rubber calender Quality Control System.

# SUPPORT CYCLE

## HPS Technical Notifications

Definitions:

“Software Package” means any HPS software product developed for the specific functional release of system software.

“Standalone Software” means any HPS software product developed for independent operation from a system software functional release.

“System Software” means machine-readable data and executable programs used to define the functionality of the HPS control system and standard hardware products, but does not include firmware, operating system, application software or other software products.

“SaaS Offering” means any HPS software product which applications are hosted through the cloud and made available to end users over the internet.
