2025 HONEYWELL USERS GROUP EMPOWERING CHANGE SECURING TOMORROW

**NOVEMBER 11-13
THE HAGUE,
THE NETHERLANDS**

Honeywell

BEFORE you register for the 2025 Honeywell Users Group (HUG) EMEA conference, please check if your company has a valid Honeywell Process Solutions SESP – Training Match Fund (TMF), or an A360 contract containing HUG passes.

If so, you will need to contact your Honeywell account manager first, to verify if your contracted funds can be used.

If this is the case your Honeywell account manager will arrange personalized discount codes for you/your peers, for use on the HUG registration payment page.

In all other cases, the HUG conference registration fee requires payment by credit card.

See the [2025 Honeywell Users Group \(HUG\) EMEA conference webpages](#).

We look forward seeing you there!

Warm regards,
The HUG organizational team.

QCS Digital Catalog: Your Gateway to Easy Ordering

Dear Valued Customers,

We are thrilled to announce you can now directly access our comprehensive [QCS Digital Catalog](#). This feature allows you to browse products, check pricing and availability, and place orders directly through our website.

On our [website](#), under Products, navigate to Control & Supervisory Systems then to Quality Control Systems (QCS) to begin exploring all the catalog has to offer. Find product information, part numbers, documents, and more.

You can also apply your P1, P2, and Parts Replacement entitlements to your online orders, making the process seamless and efficient.

If you need to register for an account to place orders online, simply register [here](#).

Contact for Training & Online Assistance: HPSDigital@Honeywell.com

Thank you for choosing us for your product needs. We look forward to serving you better with our QCS Digital Catalog.

Sincerely,

Global eCommerce Team

Global Honeywell Academy Training Solutions

July 2025

Welcome to the July edition of “Global Honeywell Academy Training Solutions”.

As always, we are excited to share the latest updates, insights, and innovations from Honeywell that we believe will add value to you.

As always, our goal is to provide you with the most current and relevant information to help you stay ahead in your field. This month's edition is packed with exciting content tailored to keep you informed and inspired.

Below, you will find the latest updates:

1. Exciting Update: SESP Customers Can Now Use Training Match Funds for Certification Programs!

We are thrilled to announce a significant update that will benefit our SESP customers. Effective immediately, SESP customers can now utilize their Training Match funds to purchase certification programs. This new development creates a great opportunity for clients to enhance their skills to make the workforce more competent and advance their careers through our certification offerings to prepare for future challenges.

Customers can contact respective account managers for more understanding on how to take advantage of this new benefit. If you have any questions or need further information, feel free to reach out to the regional contacts.

We are pleased to invite you to watch a brief video on Honeywell Automation Certification (HAC) Program. This video provides an overview of the program and its benefits. You can view it by clicking the link below:

[Honeywell Automation Certification \(HAC\) Program](#)

Don't miss out on this chance to elevate your career and enhance your professional skills. Start enrolling in the Honeywell Automation Certification Program today!

2. Enhance Your Skills with Our New Experion PKS Training Courses!

We are happy to announce the launch of our latest training course, "Experion PKS: Fundamentals – Control Hive Implementation (EXP-1026)." This comprehensive course is designed to provide participants with a full understanding of both the hardware and software facets of the Experion PKS Control HIVE & IO HIVE. Participants will learn the network considerations, smart assignment tool, import/export and checkpoint operations for Control HIVE. This course includes extensive hands-on lab exercises where participants will build and configure an IO HIVE, Control HIVE and CN100 as controller. Also, participants will learn to use IO HIVE channels in the traditional PCNT02/PCNT05 controller.

In addition to this new offering, we are also pleased to inform you about two upcoming courses that will further enhance your expertise:

1. Experion PKS: Fundamentals – ELCN Implementation (EXP-1031)
2. Experion PKS: Advanced – EHPM/EHPMx Implementation (EXP-1032)

We will share additional information soon.

Don't miss this opportunity to stay ahead in your field. Enroll now and take the next step in your professional development with our expert-led training courses.

3. Honeywell Cyber Insights and Secured Media Exchange (SMX) courses available with monthly schedule

We are happy to announce that, following training courses on Honeywell's innovative products and solutions are now available in VILT (Virtual Instructor-Led Mode) on a monthly basis

- OTCS-3001-VILT – Honeywell Cyber Insights User and Maintenance training
- OTCS-3002-VILT – Honeywell SMX User and Maintenance

In addition, the following course is also available in AT (Asynchronous) mode / Self-paced mode as well:

- OTCS-3002-AT – Honeywell SMX User and Maintenance

These courses have extensive hands-on practice labs which provides unique practical experience for the participant to learn about these products / solutions.

Thank you for being a part of our community, and we look forward to your feedback and engagement.

For any additional information or any specific inquiries, do not hesitate to reach out to your account manager directly or write to the regional contacts below.

Regional Contacts:

- APAC Pole Leader: Mini Goyal - Mini.Goyal@Honeywell.com
- EMEA Pole Leader: Joao Mestre - Joao.Mestre@Honeywell.com
- AMER Pole Leader: Nerio Gutierrez - Nerio.Gutierrez@Honeywell.com

For any inquiry or additional information regarding Cybersecurity Trainings

-Cybersecurity Trainings Leader: Rajan Patil - Rajan.Patil2@honeywell.com or Cybersecurity.Trainings@Honeywell.com

We are committed to addressing any inquiries you may have and ensuring a smooth integration of our innovative solution into your business operations.

Warm regards,

Honeywell Academy

PRODUCTS HIGHLIGHTS

Innovative Software & Service Subscription Package Announcement

Honeywell is pleased to announce the launch of its innovative software and services subscription package. This package will enable us to deliver sustained customer outcomes by providing innovative software and value-added services that allow customers to optimize the value they receive from their software investments.

Currently, customers invest in software and a variety of adoption services, such as installation and training, and begin to derive value from the application. Initial adoption challenges emerge as personnel and system changes occur. As time passes, on-site personnel build system expertise, and new features are requested based on system usage. However, as new features are released, upgrades are frequently delayed due to budgetary reasons. Additionally, on-site experts often transition to new roles, resulting in knowledge erosion.

By shifting to this new subscription-based approach, we will now be at the forefront of helping customers:

- Scale usage based on their evolving business needs
- Offer continuous upgrades and updates to our latest offerings without the disruption of traditional upgrade cycles
- Increase faster time-to-value and simplify access to phase one products
- Lower upfront costs with predictable, recurring pricing
- Provide customers with our expert support and tailored customer service

The subscription packages officially launched, include:

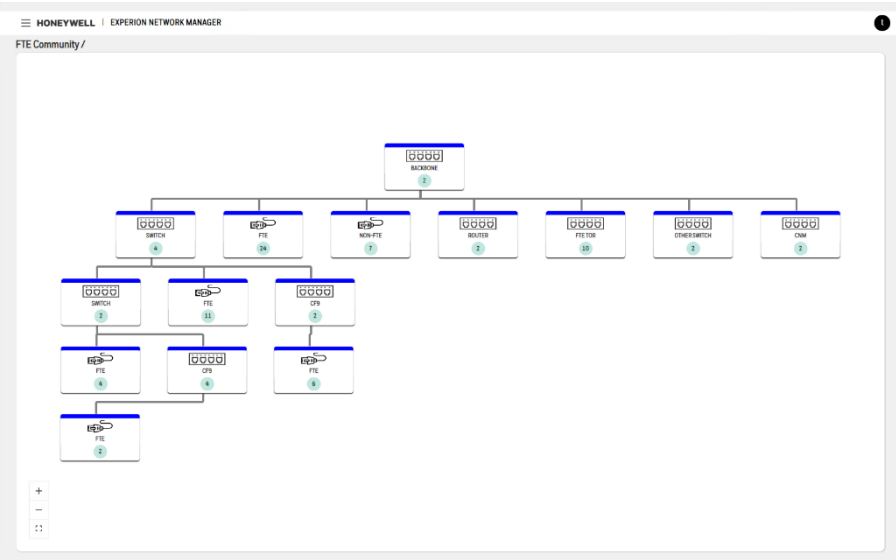

- Alarm Management
- Operations Management
- Process History Database (PHD)
- Advanced Process Control (APC)
- Asset Performance Management (APM)

These offerings are available now, unlocking sustained outcomes through software and services that evolve in response to our customers' needs. For more information, please contact your Account Manager.

Experion Network Manager R101.1 – Release Announcement

Honeywell has launched Experion Network Manager R101.1. Experion Network Manager (ENM) is an advanced on-premises solution from Honeywell, designed to enhance Fault Tolerant Ethernet (FTE) network management and reduce the risk of down-time by ensuring optimal networking performance and minimizing the risks of Loss of View (LOV) and Loss of Control (LOC) due to network misconfigurations. ENM provides a centralized platform to manage your network within Experion systems, saving you valuable time and simplifying complex configurations.

Initial R101 release includes visualization of the network, basic monitoring functions for scanning and validation of configuration baselines. Future releases will further strengthen management capabilities for network components by adding advanced capabilities in terms of configurations and management of FTE.

Show per Page # 10

ENM R101.1 Key Features include:

- **Traceability:** Provides comprehensive tracking for FTE network and device connections.
- **Visualization:** Offers detailed visualization of network connections and switch port association for connected devices.
- **Compliance:** Ensures adherence to critical switch configurations, dynamically learns the device type connected to the switch, and validates the required settings based on Experion User Configuration.
- **Troubleshooting:** Assists in network troubleshooting.

Function examples:

- Detect and report the FTE Cross cable connections (both edge devices and uplinks).
- Checks for the required Spanning-tree priorities and instances, Access Control Lists (ACLs) and Quality of Service (QoS) policies.
- Scan and validates the connected device type and checks for interface speed/duplex correctness, the system compatibility with the Honeywell qualified IOS and other security settings.

OneWireless R331.1 Release announcement

Honeywell has launched the OneWireless R331.1 release. Honeywell OneWireless remains to be second-to-none industrial wireless infrastructure while being able to manage multi-protocol and multi-standard systems to fit into the different customer infrastructure requirements.

Key Features added in this release:

- Support for 3rd party LoRaWAN Gateway and Device integration
 - Kona LoRaWAN Gateway for C1D1 area
 - MultiTech LoRaWAN Gateway
- Cisco LoRaWAN Gateway TimeSync over NTP
- PCAP Replacement
 - Cisco IW9167EH-x-HZ integration with Field Device Access Point Gen 3 (FDAP32)
- Security Improvements
- Product Quality Improvements

Important note to customers: As per the recent finding of Operating System Vulnerability issue, RTLS Product removed from Sales and CDA security issue, the OneWireless releases below were removed from sale and support. “Planned patches” column shows the supported releases from now on, Honeywell recommends migrating all systems to R331.1 and R322.5 once it is available.

Releases to be removed	Remarks	Planned Patches	Planned Date
R310.3	This release will stop being supported, there is no more support for 32-bit Operating System.	No Support	NA
R323.1	RTLS Support Removed. This release was specific to RTLS features.	No Patch required	NA
R322.1, R322.2, R322.3, R322.4	Operating System Vulnerability + CDA security Issue	R322.5	End of Aug 2025
R330.1, R330.2, R330.3	Operating System Vulnerability + CDA security Issue	R331.1	End of June 2025

Safety Management Systems R213.2

Safety management Systems release R213.2 has been released and is available for shipment.

Safety Management Systems R213.2 is common software platform for Safety Manager and Safety Manager SC systems. Safety Management Systems R213.2 contains the following components:

Software component	Functionality	Version
Safety Builder	Engineering and maintenance software	213.2
Safety Manager SC controller & IO	Firmware for Safety Manager SC platform	213.2
Safety Manager controller & IO	Firmware for Safety Manager platform	164.2

Current users of Safety Manager SC are advised to upgrade to R213.2 or at least use a supported software version. The status of the various Safety Manager software releases is available in the Safety System Software Support Guidelines. This document can be found at the Honeywell Process Solutions support portal: <https://process.honeywell.com/us/en/home> (sign in is required).

For questions or more details on Safety Management Systems R213.2 please contact your Honeywell local account manager.

Experion PKS Platform Announcements

End of Sale Announcement – MZ-PCIS02 Ruggedized Server

The Dell PowerEdge XR11 has transitioned to End of Sale status effectively immediately. The following model numbers are impacted by this transition:

Model Number	Description
MZ-PCIS02	SERVER HW DELL XR11 PERF RACK TPM

Honeywell is evaluating options for a replacement server platform with marine type approval, with an expected release date in Q4 2025.

New Honeywell Service Can Help Strengthen Your OT Cybersecurity: The Honeywell OT SOC, available, June 2025.

Honeywell announces the release of the Honeywell Operational Technology Security Operations Center (OT SOC), which is an evolution of Honeywell's Advanced Monitoring and Incident Response service.

The AMIR service will continue to provide the robust 24/7 monitoring and response coordination capabilities customers rely on. The new Honeywell OT-SOC is designed for clients seeking an even more comprehensive solution, building upon our proven AMIR foundation.

What makes the Honeywell OT SOC different?

The primary enhancement is the integration of on-site incident management and recovery. This means:

- **Hands-On Support:** Specialized Honeywell personnel available on-site to assist with incident recovery and remediation, helping to minimize downtime and restore operations faster.
- **Comprehensive Incident Lifecycle Management:** From preparation (playbooks, drills) through detection, containment, eradication, and post-incident analysis, now with on-site coordination.

-

What do customers get with the Honeywell OT SOC?

- **24/7 x365 specialized OT monitoring solution**
 - Agnostic and agentless proprietary technology.
 - Hundreds of OT/ICS Data Sources unique to OT environments.
- **OT specific detection capabilities**
 - Hundreds of proprietary behavioural rules built specifically for OT.
 - Detection rules fine tuning for better detection & reduced alert fatigue.
 - Dedicated and curated Threat Intelligence.
 - Specialized personnel trained to understand the systems, plant processes and human behaviour.
- **24/7 x365 available teams for Incident Response & Disaster Recovery**
 - Remotely provided by the AMIR Team (OT-MDR).
 - On Premise provided by the OT SOC specialized personnel for recovery and remediation efforts.
- **Governance**
 - Monthly governance meetings for performance reporting, service improvement, planning & testing.
 - Customer feature request consideration based on their needs.
- **Preparation**
 - Continuous performance measurement.
 - Tabletop exercise for incident readiness and minimization of potential impact
 - "Network effect" with cross-site/cross-customer visibility enables continuous learning and improvement
- **Compliance**
 - Regulations & cybersecurity frameworks revolve around the concepts of "Identify, Protect, Detect, Respond, and Recover" which all are core functionalities within the Honeywell OT SOC.
 - Service provided by a certified ISO 20000-1 & 27001 MSSP

The Honeywell OT SOC platform is built for growth. Beyond the first release, we are already planning even more features to further enhance its capabilities, including:

- *Manual & automated Governance Risk & Compliance (GRC) checks*
- *A SOC2 certified Virtual Private Cloud with regional redundancy*
- *Advanced threat intelligence and predictive analytics, including IT SOC integration for a holistic risk view and remediation*
- *More advanced threat identification capabilities leveraging new Honeywell Cyber Proactive Defense software to help identify cyber threats early*
- *Dedicated Threat Hunting T3 Analysts for customer accounts*
- *Automated remediation reporting for streamlined insights*
- *Native integration with more Honeywell security solutions (like SMX Cyber & Predictive Capabilities)*
- *A refreshed OT-SOC dashboard for enhanced user experience*
- *Forensics capabilities for in-dept investigation*
- *ISO 22301 certification for enhanced business continuity management*

To Help Customers Enhance Cybersecurity, Honeywell Cyber Insights is Being Added to Managed Security Services Contracts

As cyber threats continue to evolve and OT environments are being specifically targeted around the world, more needs to be done to help ensure OT networks are protected¹. To help strengthen our customer's cybersecurity defenses and enhance their cyber posture, Honeywell is announcing an important enhancement to our Managed Security Services (MSS). Effective on renewal, all MSS contracts will now include Honeywell Cyber Insights.

What is Honeywell Cyber Insights?

Honeywell Cyber Insights is a powerful cybersecurity solution designed to provide comprehensive visibility and proactive asset and threat detection.

By integrating Cyber Insights with the existing MSS offering, customers gain access to:

- Advanced Analytics: a deeper understanding of their security landscape.
- Real-time Monitoring: continuous oversight of their critical assets.
- Actionable Intelligence: practical insights to more effectively mitigate risks effectively.

This value-added component will enhance customers security by identifying vulnerabilities, mitigating risks, and helping to ensure compliance with industry standards, ultimately providing customers with a clearer view into their cyber threat landscape.

What's included in the automatic upgrade?

The renewed 2025 contract will now include:

- A software appliance license for up to 50 assets.
- Installation and configuration on a single switch.
- Ongoing support, including software and threat intelligence feed updates.

Should a hardware component be necessary for environments where a virtual setup isn't available, it will also be delivered and is included in the standard pricing.

We believe Cyber Insights will be an invaluable addition to customers' cybersecurity defenses, providing them with enhanced protection and peace of mind.

¹ Various CISA Cybersecurity Alerts, US Government, 2025

SUPPORT CYCLE

Alarm Configuration Manager (ACM) End Of Life

After careful analysis, we have decided to extend support for ACM by 12 months. With this extension, ACM Phased-Out Support will begin December 31, 2026. All support ends December 31, 2027.

This decision is aimed at helping customers successfully migrate from ACM to APO by December 31, 2027.

Important Dates:

- December 31, 2025: End of Sale
- December 31, 2026: Beginning of Phased-Out Support
- December 31, 2027: End of Support

Key Terms:

- End of Sale: No new ACM sales will be made from this point
- Phased-Out Support: Limited TAC Support, commercially reasonable effort support, No new enhancements will be made to the product
- End of Support: No TAC Support, No defect fixes, No development

We look forward to continuing to provide you with industry-leading alarm management solutions. If you have any questions, please contact your Honeywell Aftermarket Services Manager.

Note: Software releases not listed in the table are in “Phased Out” lifecycle status. The HPS Product Support Guide for Control, Safety and Monitoring Systems is available for download following link below (Requires Login)

<https://process.honeywell.com/us/en/support/technical-publication?search=product%2520support%2520guide%2520for%2520control%2520safety%2520and%2520monitoring%2520systems>

Definitions:

“Software Package” means any HPS software product developed for the specific functional release of system software.

“Standalone Software” means any HPS software product developed for independent operation from a system software functional release.

“System Software” means machine-readable data and executable programs used to define the functionality of the HPS control system and standard hardware products, but does not include firmware, operating system, application software or other software products.

“SaaS Offering” means any HPS software product which applications are hosted through the cloud and made available to end users over the internet.
