Join the celebration: 50th Annual Honeywell Users Group (HUG) Symposium – June 8-11
Phoenix, Arizona, USA

Join us at [2026 Honeywell Users Group \(HUG\)](#) for the **Autonomous & Cognition** track, an action-packed agenda focused on the journey from automation to autonomy. In a nutshell:

- **AI & Autonomous** Meeting and expert roundtables on agentic AI, workforce readiness, and operational transformation
- **Technology breakouts** covering Experion® Cognition, Intelligent Autonomy, Edge Computing, Turbomachinery Control, LNG optimization, and Safety modernization
- **Customer success stories** from Chevron, ExxonMobil, TotalEnergies, Cheniere, and more—sharing real-world paths to resilient, intelligent operations
- **Spotlights & demos** including Live Migration (C300PMNX), Physical AI in the process industry, Automated PLC Migration, and AI integration into Experion® PKS
- **Tours & workshops** on Industrial AI & Cognition, upstream operations, and hands-on Experion best practices

HUG 2026 is your opportunity to learn from peers, see what's next, and move confidently toward autonomous operations.

[🔗 Register now](#) and be part of the conversation.

The 2026 HUG Steering Committee and Honeywell Process Automation look forward to welcoming you to Phoenix for this special HUG celebration.

Thank you to our 2026 SPONSORS:

Order Management Spotlight: Reports

Order Management Account Select ALL ORDERS LATEST ACTIVITY FOLLOWED REPORTS GET HELP

Select the report criteria and click "Create Report" to download the details.

RESET SELECTIONS CREATE REPORT

Dear Valued Customer,

The **Reports** section in Order Management puts your most important order activity in one place so you can quickly find what you need, confirm status, and keep your records up to date. From daily check-ins to month-end reconciliation, **Reports** helps you go from "Where is it?" to "Here it is" in just a few clicks.

Use Reports to view and track:

- **Order History** – confirm what was placed and when
- **Open Orders** – see what's in progress at a glance
- **Invoices** – support billing review and reconciliation
- **Shipments** – track what has shipped and what's still pending

How to access Order Management

Visit Order Management here:

<https://process.honeywell.com/portal/us/en/order-status>

- **Note:** You must be signed in to view Order Management. If this is your **first time signing in**, you'll need to create an account to access your orders.
- Create your account here:
<https://process.honeywell.com/us/en/my-hps/register>

Once signed in, you'll be able to view your order history and take advantage of our **Reporting** capability right away.

Sincerely,

Global eCommerce Team

April 2026

Welcome to the April edition of “Global Honeywell Academy Training Solutions”.

As always, we are excited to share the latest updates, insights, and innovations from Honeywell that we believe will add value to you.

Our goal is to provide you with the most current and relevant information to help you stay ahead in your field. This month's edition is packed with exciting content tailored to keep you informed and inspired.

Below, you will find the latest updates:

1. UPCOMING CYBERSECURITY TRAININGS IN ASIA PACIFIC:

We're pleased to announce that enrollment is now open for external customers for our Cybersecurity Virtual Instructor-Led Training (VILT): OT Cybersecurity: Advanced Network Security (OTCS-2003).

Course overview

The course offers a comprehensive overview of network fundamentals, including major networking models and their comparisons, different network types and security concerns amplified with network disaster recovery planning, ICS protocols and network security compliance. Participants gain both foundational and advanced insights into network management and security through comprehensive coursework and hands-on scenario-based labs.

Session details:

Course: OT Cybersecurity: Advanced Network Security (OTCS-2003)

Dates: 22–24 June 2026

Format: Virtual Instructor-Led Training (VILT)

Language: English

Time zone: Perth Time

Who should attend

Designed for OT cybersecurity and control-system professionals, including engineers, asset owners, managers, IT/OT staff, and system administrators.

What you will learn (high level)

Introduction and key concepts

Configuration and troubleshooting approaches for secure OT networks

Hands-on, scenario-based labs

👉 Seats are limited, so plan early and secure your place!

For registration write to hps-training-apac@honeywell.com

For any additional information regarding cyber security training please write to Patil, Rajan Rajan.Patil2@Honeywell.com

Thank you for helping strengthen our security culture.

2. UPCOMING HONEYWELL ACADEMY COURSES- HOUSTON, TX FACILITY:

We're pleased to announce that enrollment is now open to external customers for the following new and upcoming Honeywell Academy courses. Seats are limited and filling quickly—request enrollment today to secure your spot.

1. EXP-1031 – Experion PKS: Fundamentals - ELCN Implementation

- a. This course provides an introduction to the terminology, configuration and functions of the ELCN System consisting of EUCN with EHPM/EHPMx controller.
- b. Schedules: Click [here](#)
- c. Instructor-Led Training at Houston, TX facility

2. EXP-1032 – Experion PKS: Advanced - EHPM/EHPMx Implementation

- a. For personnel who already have a fully implemented ELCN system and responsible for building EHPM points, writing CL programs from an Experion Station-TPS.
- b. Schedules: Click [here](#)
- c. Instructor-Led Training at Houston, TX facility

3. **EXP-1033 – Experion PKS: Fundamentals – ELCN/EUCN/EHPMx/C300PM Maintenance**
 - a. Learn to maintain the EUCN, EHPMx/C300PM and the Universal Embedded Appliance (UEA) hardware components, and recommended troubleshooting practices.
 - b. Training Dates: September 14 – 18, 2026
 - c. Instructor-Led Training at Houston, TX facility
4. **HAPC-0001-VILT – Honeywell Advanced Process Control: Fundamentals – Process Controller Implementation**
 - a. Course participants will learn the multivariable predictive control design and implementation using Process Controller software.
 - b. Training Dates: September 21 – 25, 2026
 - c. Virtual Instructor-Led Training (VILT)
5. **EXP-21 – Experion PKS: Fundamentals – Experion Batch Manager (EBM) – Instance Based Recipes Implementation**
 - a. Course participants will learn how to apply the Experion® Batch Manager (EBM) to continuous and procedural operations.
 - b. Training Dates: May 26 – 29, 2026
 - c. Instructor-Led Training at Houston, TX facility
6. **EXP-1011 – Experion PKS: Advanced – Class Based Recipes Implementation**
 - a. Course participants will learn how to perform Experion Batch Manager (EBM) tasks.
 - b. Training Dates: June 1 – 3, 2026
 - c. Instructor-Led Training at Houston, TX facility
7. **USD-0001-VILT – Honeywell UniSim Design: Fundamentals – Process Modelling Using UniSim Design**
 - a. Course participants will learn how to build, evaluate and optimize steady state process flowsheets using UniSim Design.
 - b. Training Dates: September 14 – 15, 2026
 - c. Virtual Instructor-Led Training (VILT)
8. **USD-0003-VILT – Honeywell UniSim Design: Fundamentals – Dynamic Modelling Using UniSim Design**
 - a. Course participants will learn how to develop the skills and understanding required for creating and running dynamic simulations using UniSim Design Dynamics.
 - b. Training Dates: September 16 – 18, 2026
 - c. Virtual Instructor-Led Training (VILT)
9. **USD-0002-VILT – Honeywell UniSim Design: Advanced – Process Modelling Using UniSim Design**
 - a. Participants will learn how to use and apply advanced modelling techniques to enhance existing UniSim Design models.
 - b. Training Dates: September 21 – 22, 2026
 - c. Virtual Instructor-Led Training (VILT)

[Click here](#) to explore all scheduled courses and find the right session for you.

Thank you for being a part of our community, and we look forward to your feedback and engagement.

To explore our currently scheduled global courses, [Click here](#) to visit our website.

For any additional information or any specific inquiries, do not hesitate to reach out to your account manager directly or write to the regional contacts below.

Regional Contacts:

- ✚ **Americas-Canada-Latin America:** HPSTrainingUSCANLAR@Honeywell.com
 - Pole Leader: Nerio Gutierrez - Nerio.Gutierrez@Honeywell.com
- ✚ **Europe-Middle East-Africa:** HPS-Training-EMEA@Honeywell.com
 - Pole Leader: Joao Mestre - Joao.Mestre@Honeywell.com
- ✚ **Asia Pacific:** HPS-Training-India@Honeywell.com
 - Pole Leader: Mini Goyal - Mini.Goyal@Honeywell.com

For Cybersecurity training:

Global Manager (OT Cybersecurity Training Services)-Rajan Patil - Rajan.Patil2@Honeywell.com

We are committed to addressing any inquiries you may have and ensuring a smooth integration of our innovative solution into your business operations.

Warm regards,

Honeywell Academy

PRODUCTS HIGHLIGHTS

Now Available! Honeywell Trace™ R170 Document and Change Management Solution

Honeywell Trace™ is an advanced documentation and change-management solution that automatically captures configuration data and tracks system changes, helping you reduce your documentation efforts, catch engineering misconfigurations and improve change accuracy. With multi-site scalability and intuitive topology views, Trace enhances productivity, supports safer operations and preserves critical engineering knowledge across the enterprise.

We are now excited to announce the latest release, R170, which helps you further streamline your documentation and change management workflows.

Added benefits you will get when moving to the R170 version:

- **Enhanced features:**
 - Experion PKS project data collection, enabling comparison between project and monitoring data
 - Complete support for PHD system (now includes calculation scripts, virtual tags, RDI links, PHD tag connections)
 - Spares Insights, providing high-level information on controllers, I/Os and system
 - Tag description search capability for assets and tags
 - EB ordering view for TPS points
- **Enhanced data collection and page loading:**
 - Optimized interfaces with faster loading
 - 20% reduction in data collection time
- **Expanded support:**
 - PHD R430,
 - ABCLX v31 to v37
 - OSIPi interface
- **Enhanced view:**
 - FLD logic for SM and FSC
 - CLM topology
- **Platform updates:** Windows Server 2022 and SQL 2022

How do you get Honeywell Trace R170?

- If you have an existing Honeywell Trace support contract, software upgrade to the new release is free of charge.
- If you are using Honeywell Trace but don't have an active support contract, reach out to your Honeywell representative to sign up for a term license.
- If you don't have Honeywell Trace but want to reduce time spent on documentation and change management, please reach out to your Honeywell account manager.

To access the latest technical publications for Honeywell Trace, log in to process.honeywell.com using your Honeywell credentials.

For more information on Honeywell Trace and how it can help you, please visit

<https://process.honeywell.com/us/en/initiative/trace/trace>.

Experion PKS® Computing Platforms Announcement

Honeywell has qualified and released the following Nutanix Management Switch. Specification datasheets are available at <https://process.honeywell.com/>.

The following model numbers is now introduced:

Model Number	Description
MZ-PCVS04	VIRT PREM TOR SWITCH XC 48-PORT

The following model number has transitioned to End of Sale status:

Model Number	Description
MZ-PCVS03	VIRT PREM TOR SWITCH XC 28-PORT

Uniformance® Excel Companion Release

Uniformance® Excel Companion is an add-in for Microsoft Excel that allows users to make advanced data queries to retrieve large data sets from their historian. Excel Companion can query Raw, Aggregated and Event Data from a number of sources including Honeywell PHD, OPC.HDA, Intuition DAS and CEJ. This software can be used for brand new installation of Excel Companion, or to support a migration upgrade from Excel Companion R321.x, R322.x or R323.1.

New Features

This release contains the following enhancements to the Honeywell Uniformance® Excel Companion product:

- **Standalone Tag Explorer for Excel Companion**

The Tag Browser control in Excel Companion is hosted by the main Excel process. A standalone executable for this control can be run from the Excel Companion install folder, eg: C:\Program Files\Honeywell\Uniformance\Excel Companion\Honeywell.Desktop.TagExplorer.exe. It will share the datasource configuration with Excel Companion, and run in the appropriate x86 / x64 mode for the Excel Companion installation.

- **Reduced install size**

The Excel Companion codebase has been optimised to remove unnecessary references

Issues Resolved

	Subsystem	Description	ID
1	Excel Companion	Stale data remains in the worksheet is time range is reduced	RUPS-256
2	Excel Companion	EC cannot query virtual character function (returning non-numeric data) inside a tag list	RUPS-2569

Honeywell Uniformance Insight R2.5.1 Release

The latest Uniformance Insight release is version R2.5.1 aimed at addressing key customer requests is released in April 2026.

The key features include:

New Features

- o **Logout on idle timeout for OIDC deployments:** *When idle timeout is enabled, the system will log out users in OIDC deployments after the timeout period. Users must log in again to access the system.*
- o **Unique sign on:** *Users can now configure unique sign-on via the HCP Portal configuration tool. This feature restricts a user to one active session per device at a time. If you attempt to log in from a second device while the account is active elsewhere, a warning message will appear. To initiate a new session, you must first terminate the existing one.*

Feature Improvements

- o **Scale mode for new traces added to a trend:** *The scale mode for newly added traces now matches the scale mode of the first visible trace in the trend, rather than defaulting to auto scale.*
- o **Tag Range in the time series trend:** *The time series trend is now stricter about when it will display the scale mode of a trace as being in Tag Range. For this to happen a source range for the tag must have been received from the data source. There may be some delay when a trend is loaded, or a trace added where Custom is displayed until the source range of the trace is received. In cases where the source range is never received, the scale mode of the trace will remain as Custom.*
- o **Unit configuration in the time series table:** *Users can now change the unit of measure for a column in the time series table via the right-click menu. If conversion from the default unit is not possible, an error message will appear. This feature is helpful when requesting a non-default unit that will return multiple values, for example, an integration result.*
- o **Filtering string values in the time series table:** *Users can now filter columns containing string data, such as enumerations, in the time series table. Previously, only numeric filters were available for all columns. Now, filters are context-specific, allowing for appropriate filtering based on column content.*
- o **Row animation in the time series and event tables:** *Row animation has been disabled in the time series and event tables during actions like column sorting. This change improves performance for large datasets.*
- o **Event query performance improvements:** *Additional properties have been introduced to optimize event data retrieval. Users can now adjust the SQL query timeout and optionally add the (RECOMPILE) flag to event queries.*

- **SQL Query Timeout:** *Configurable on the data access configuration page for the CEJ connection instance, with a default of 30 seconds*
 - **Recompile SQL Query:** *This option is available under advanced settings on the same configuration page. It may enhance query performance by addressing issues related to SQL parameter sniffing.*
-
- o **Experion display migration:** *Helper scripts for Experion display migration are now included in the Uniformance® Insight R2.5.1 media. These scripts assist with initial setup and CSS migration.*
 - o **Data Item Browser style update:** *Minor cosmetic adjustments have been made to the styling of the Data Item Browser.*

Definitions:

“Software Package” means any HPS software product developed for the specific functional release of system software.

“Standalone Software” means any HPS software product developed for independent operation from a system software functional release.

“System Software” means machine-readable data and executable programs used to define the functionality of the HPS control system and standard hardware products, but does not include firmware, operating system, application software or other software products.

“SaaS Offering” means any HPS software product which applications are hosted through the cloud and made available to end users over the internet.
