Improvements to Your eCommerce Search Experience

SEARCH 2.0 | SEARCH QUALITY COMPARISON

PREVIOUS STATE

NOW

Dear Valued Customer,

We're excited to share several updates to our search functionality for **Knowledge Articles** and **Technical Publications**, designed to help you find the right information faster and with greater confidence.

What's new

- More relevant results based on dates, so newer and more timely content is easier to find
- File matches now display an "Excerpt," so you can quickly preview why a result is relevant
- Improved exact-match results when you search for a specific term or phrase
- Matched words in results are bolded to make it easier to scan and confirm you're in the right place

Get started

To explore the enhanced search experience, please register or sign in here:

- **Register:** <https://process.honeywell.com/us/en/my-hps/register>
- **Sign in:** <https://process.honeywell.com/>

Thank you for your continued partnership. We look forward to supporting you with a faster, easier search experience.

Sincerely,

Process Automation eCommerce Team

June 2026

Welcome to the June edition of “Global Honeywell Academy Training Solutions”.

As always, we are excited to share the latest updates, insights, and innovations from Honeywell that we believe will add value to you.

Our goal is to provide you with the most current and relevant information to help you stay ahead in your field. This month's edition is packed with exciting content tailored to keep you informed and inspired.

Below, you will find the latest updates:

1. Experion PKS Certification Program in Process Control Techniques

We are excited to announce a joint "**Certification Program in Process Control Techniques**" by the School of Engineering, **Newcastle University**, and **Honeywell Process Solutions**.

Newcastle University, a founding member of the Russell Group and a Global Top 110 university (QS World University Rankings 2024), is dedicated to excellence, creativity, and innovation.

This two-week intensive program is designed for Process engineers, Plant operators, Plant managers, Control system engineers, Students, New Hires, and Industry professionals seeking career advancement. It will develop awareness of measurement principles and instrument design features, with hands-on experience on the Honeywell C300 platform.

Program Details

Location: School of Engineering, Newcastle University, Newcastle upon Tyne, United Kingdom

Duration: 2 weeks

Date: 30th November to 11th Dec 2026

Objectives:

- ✓ Understand Distributed Control
- ✓ Build Control Strategies
- ✓ Process Control Basics
- ✓ Process Control Labs (hands-on)

For any additional information write to HPS-Training-EMEA@Honeywell.com

2. New and upcoming Honeywell Academy courses are available and open for enrollment.

Honeywell Academy is thrilled to present the following training courses. We encourage you to request enrollment as soon as possible, as seats are limited and in high demand. Don't miss out on this excellent opportunity to enhance your skills and advance your professional development with Honeywell Academy. We look forward to seeing you in our courses soon!

 **Reserve your spot today to ensure your team doesn't miss out.**

1. EXP-1031 – Experion PKS: Fundamentals - ELCN Implementation

- a. This course provides an introduction to the terminology, configuration and functions of the ELCN System consisting of EUCN with EHPM/EHPMx controller.
- b. Schedules: Click [here](#)
- c. Instructor-Led Training at Houston, TX facility

2. EXP-1032 – Experion PKS: Advanced - EHPM/EHPMx Implementation

- a. For personnel who already have a fully implemented ELCN system and responsible for building EHPM points, writing CL programs from an Experion Station-TPS.
- b. Global Schedules: Click [here](#)
- c. Instructor-Led Training at Houston, TX facility

3. EXP-1033 – Experion PKS: Fundamentals - ELCN/EUCN/EHPMx/C300PM Maintenance

- a. Learn to maintain the EUCN, EHPMx/C300PM and the Universal Embedded Appliance (UEA) hardware components, and recommended troubleshooting practices.
- b. Global Schedules: Click [here](#)
- c. Instructor-Led Training at many of our global training facilities

4. HAPC-0001-VILT - Honeywell Advanced Process Control: Fundamentals - Process Controller Implementation

- a. Course participants will learn the multivariable predictive control design and implementation using Process Controller software.
- b. Global Schedules: Click [here](#)
- c. Virtual Instructor-Led Training (VILT)

5. HAPC-0002-VILT - Honeywell Advanced Process Control: Fundamentals - Process Controller Maintenance

- a. Course participants will learn to evaluate and improve the performance of Process Controller applications, and to adjust the application model.
- b. Global Schedules: Click [here](#)
- c. Virtual Instructor-Led Training (VILT)

6. USD-0001-VILT - Honeywell UniSim Design: Fundamentals - Process Modelling Using UniSim Design

- a. Course participants will learn how to build, evaluate and optimize steady state process flowsheets using UniSim Design.
- b. Global Schedules: Click [here](#)
- c. Virtual Instructor-Led Training (VILT)

7. USD-0003-VILT - Honeywell UniSim Design: Fundamentals - Dynamic Modelling Using UniSim Design

- a. Course participants will learn how to develop the skills and understanding required for creating and running dynamic simulations using UniSim Design Dynamics.
- b. Global Schedules: Click [here](#)
- c. Virtual Instructor-Led Training (VILT)

8. USD-0002-VILT - Honeywell UniSim Design: Advanced - Process Modelling Using UniSim Design

- a. Participants will learn how to use and apply advanced modelling techniques to enhance existing UniSim Design models.
- b. Global Schedules: Click [here](#)
- c. Virtual Instructor-Led Training (VILT)

Thank you for being a part of our community, and we look forward to your feedback and engagement.

To explore our currently scheduled global courses, [Click here](#) to visit our website.

For any additional information or any specific inquiries, do not hesitate to reach out to your account manager directly or write to the regional contacts below.

Regional Contacts:

We are committed to addressing any inquiries you may have and ensuring a smooth integration of our innovative solution into your business operations.

Warm regards,

Honeywell Academy

PRODUCTS HIGHLIGHTS

Digital Prime™ | Industrial Software R1.0

Introduction

Digital Prime Industrial Software is now available within the Digital Prime platform. It provides a structured way for you to monitor, manage, and improve the performance of your industrial software.

What You Can Do

- Monitor the health and performance of your applications
- Identify lifecycle risks and plan upgrades with better visibility
- Access training, reports, and insights from one place
- Act faster with health alerts and system usage visibility

How It Helps

- Detect issues early and reduce downtime
- Keep software current and supported
- Improve reliability and performance
- Sustain long-term value from your systems

Service Options

Sustain – Ongoing monitoring and support

Synergy – Lifecycle management and upgrade enablement

Signature – Expert-led services focused on optimization and measurable outcomes

One Unified Experience

- View system health and alerts
- Track lifecycle status and upgrades
- Access knowledge content and training materials
- Manage your industrial software more effectively

What to Expect

Digital Prime Industrial Software will continue to evolve with additional capabilities designed to improve visibility, simplify lifecycle management, and help you maintain strong performance over time.

Cyber Insights 5.0.1 Now Available

We're excited to announce the release of **Cyber Insights 5.0.1**, delivering significant enhancements across analysis, security, workflow efficiency, platform interoperability, and core infrastructure.

New Features and Enhancements

Integrations

- Integrations established with Rapid7, Fortinet, and Secure Remote Access (Cyolo).
 - Cyber Integrity (CI) can now forward events to FortiSIEM, supported by a purpose-built parser for improved accuracy and context.
 - Enhanced monitoring of secure remote access, including environments leveraged by Honeywell MSS.
 - Content sharing enabled with Rapid7 for vulnerability management and monitoring application.

Detection Advancements

- Expanded CVE coverage, including Tridium, physical security/IoT vendors, Fortinet, VMware, and others.
- Added detection coverage for Metasploit-based attack scenarios, improving visibility into techniques commonly used by penetration testers to simulate advanced threats.
- Support for CVSS 4.0 scoring.
- Introduced Sensor-level YARA rule detection capabilities.
- Detection and visualization for out-of-range assets

Compliance Advancements

- Added support for Zones and Conduits aligned with IEC 62443 standards.
- Automated Purdue Model mapping using machine learning to classify assets into appropriate Purdue levels.
- Detection and reporting for patched CVE's

Management Improvements

- API enhancements to support asset attribute sharing with third-party solutions.
- Improvements to active polling for better data collection and broader coverage.
- System data backup to remote storage.
- Compressed TTI file for faster download.
- General improvements to UI/UX

Infrastructure

- Added support for the Nutanix hypervisor.

Security:

- Security patches and updated

Honeywell Data Diode : Hardware-enforced one-way security that enables data sharing without introducing inbound risk.

We are pleased to introduce the **Honeywell Data Diode**, a hardware-enforced, unidirectional security solution designed to protect OT environments while enabling safe outbound data sharing.

What's new

- Hardware-enforced **one-way data flow (OT → IT)** that eliminates inbound attack paths
- Secure sharing of operational data without exposing OT systems
- Support for historian data, SIEM/SOC feeds, and regulatory reporting use cases

Key benefits

- **Enforced one-way security:** Physically ensures data can leave OT networks but cannot return, removing risks associated with software configuration and vulnerabilities
- **Secure visibility without exposure:** Enables monitoring, analytics, and reporting while maintaining full OT isolation
- **Export data without exporting risk:** Operational insights can be shared externally while control remains fully local
- **Compliance and audit simplification:** Helps reduce audit scope and supports clear demonstration of OT system protection

Built for OT environments Designed for legacy systems and Purdue Model architectures without impacting safety, uptime, or performance

Now Available! Honeywell Trace™ R170 Document and Change Management Solution

Honeywell Trace™ is an advanced documentation and change-management solution that automatically captures configuration data and tracks system changes, helping you reduce your documentation efforts, catch engineering misconfigurations and improve change accuracy. With multi-site scalability and intuitive topology views, Trace enhances productivity, supports safer operations and preserves critical engineering knowledge across the enterprise.

We are now excited to announce the latest release, R170, which helps you further streamline your documentation and change management workflows.

Added benefits you will get when moving to the R170 version:

- **Enhanced features:**
 - Experion PKS project data collection, enabling comparison between project and monitoring data
 - Complete support for PHD system (now includes calculation scripts, virtual tags, RDI links, PHD tag connections)
 - Spares Insights, providing high-level information on controllers, I/Os and system
 - Tag description search capability for assets and tags
 - EB ordering view for TPS points
- **Enhanced data collection and page loading:**
 - Optimized interfaces with faster loading
 - 20% reduction in data collection time
- **Expanded support:**
 - PHD R430,
 - ABCLX v31 to v37
 - OSIPI interface
- **Enhanced view:**
 - FLD logic for SM and FSC
 - CLM topology
- **Platform updates:** Windows Server 2022 and SQL 2022

How do you get Honeywell Trace R170?

- If you have an existing Honeywell Trace support contract, software upgrade to the new release is free of charge.
- If you are using Honeywell Trace but don't have an active support contract, reach out to your Honeywell representative to sign up for a term license.
- If you don't have Honeywell Trace but want to reduce time spent on documentation and change management, please reach out to your Honeywell account manager.

To access the latest technical publications for Honeywell Trace, log in to process.honeywell.com using your Honeywell credentials.

For more information on Honeywell Trace and how it can help you, please visit

<https://process.honeywell.com/us/en/initiative/trace/trace>.

HPE Aruba 6000 Switches Series - Release announcement

Honeywell has tested, qualified and released the following HPE Aruba switches and accessories:

<u>Honeywell Model Number</u>	<u>HPE Aruba Model Number</u>	<u>Description</u>
<u>SH-6000R4</u>	<u>R8N88A</u>	<u>HPE ARUBA 6000 24 PORTS SWITCH</u>
<u>SH-6000R8</u>	<u>R8N86A</u>	<u>HPE ARUBA 6000 48 PORTS SWITCH</u>
<u>SH-6300R4</u>	<u>JL658A</u>	<u>HPE ARUBA 6300M 24 PORTS SFP+ SWITCH</u>
<u>SH-63PS25</u>	<u>JL085A</u>	<u>HPE ARUBA POWER SUPPLY 250W, FOR 6300M</u>
<u>SH-CABUSC</u>	<u>R9J33A</u>	<u>HPE ARUBA Cable USB C to USB C</u>
<u>SH-CABUSA</u>	<u>R9J32A</u>	<u>HPE ARUBA Cable USB A to USB C</u>

These switches have been qualified to be used globally for Fault Tolerant Ethernet (FTE) as Backbone, Level 2 and Level 1. Being low-cost switches, they are especially useful for competitive bidding markets or small projects. Both HPE Aruba 6000 and HPE Aruba 6300M support Control HIVE and IO HIVE.

Please review the Honeywell FTE documentation for guidance about limitations and use cases for these switches.

HPE Aruba 6000

HPE Aruba 6300M

ALTIUS v5.9.0 now released

ALTIUS Hi-Performance HMI software v5.9.0 for Experion PKS is now released and available to all Honeywell customers licensed to access ALTIUS updates from Lin and Associates, Inc.

The release of v5.9.0 expands on the core principles of this Hi-Performance HMI Solution, which are to promote:

- Situational Awareness
- Operator Effectiveness
- A More Proactive Approach to Operating

A notable enhancement of v5.9.0 is the ability for ALTIUS users to save specific aspects of their ALTIUS configuration through a new feature called “Operator Profiles”. Operators can now save their preferred operating environment settings to their user profile (operating limits, widget configuration, LoopWatch and Faceplate Enhancement preferences). Switching profiles will simply apply the alternatively saved settings. These ALTIUS “Profiles” are completely independent of the Operating System or Experion user settings.

For Operator Touch Panel (OTP) users, ALTIUS's Three-Tiered Navigation Menu has been enhanced to include touch friendly functionality. Configured in the ALTIUS Application Center, enabling the touch capability provides a touch "zone" on each menu tier for ease of use via touch.

More details for ALTIUS releases can be found [here](#) (sign in required). You can also contact Shreyas Sule (Offering Manager) via shreyas.sule@honeywell.com or contact Lin and Associates, Inc. via info@linandassociates.com.

SUPPORT CYCLE

Honeywell Cyber App Control R420.1 – Mandatory Upgrade Announcement

We would like to announce the release of Cyber App Control R420.1, introducing updated security components and continued platform support. This release is primarily targeted at customers running R401.1, which has now reached end of support. **It is important to note that there are no changes to system specifications, architecture, or agent resource consumption**, ensuring transition with no additional performance overhead.

What This Means for You

Customers currently on R401.1 must migrate to R420.1 to remain in a supported environment.

Customers using older versions of App Control can upgrade to:

- R420.1 (latest recommended release)
- R410.2 (alternative supported version)

R420.1 includes updated components:

- App Control Server 8.11.4
- App Control Agent 8.10.4
- Support for SQL Server 2022 (same as R410.2) Deployment Options

R420.1 supports multiple implementation scenarios with detailed SOPs available in the Implementation Guide:

- Fresh installation of R420.1
- Upgrade from R410.2
- Migration from R401.1 and earlier versions

Important Notices

- Honeywell Cyber App Control R401.1 and earlier versions are no longer supported.
- The R420.1 package includes updated SSL certificates, installers, and reference documentation to ensure secure and streamlined deployment.
- R420.1 is qualified with EPKS R530, R520, and R511, ensuring compatibility with supported Honeywell environments.
- For any qualification queries involving Honeywell or non-Honeywell products, customers should contact Honeywell DE. Most qualified systems will not experience performance impact after upgrade.

If you have questions regarding upgrade paths or deployment planning, please contact your Honeywell representative.

Endpoint Protection Updates

SentinelOne Singularity is now qualified for use with Experion® PKS R530. This on-premises Next-Generation Antivirus (NGAV) solution delivers enhanced endpoint protection compared to traditional antivirus solutions, and its common sensor architecture enables planned future support for additional endpoint security capabilities.

SentinelOne Singularity is qualified for both Experion® PKS virtual machines and physical platforms, and detailed architecture and configuration guidance [is provided in the user documentation](#).

With this qualification, the following endpoint protection solutions and associated service offerings will be phased out effective June 30, 2027:

- Symantec Endpoint Protection
- Carbon Black Cloud Endpoint

Trellix Endpoint Security (ENS) is expected to remain qualified for use with Experion® PKS alongside SentinelOne Singularity. For a complete list of supported endpoint security solutions, please refer to the Antivirus Software Guidelines document.

Honeywell OT MDR - Google SecOps Migration Announcement

We would like to inform you of an important evolution of the Honeywell OT MDR service (formerly AMIR). As part of our ongoing cybersecurity enhancements, our existing Splunk-based SIEM platform will transition to a modernized **Google SecOps technology stack**, delivering improved detection, scalability, and operational resilience.

What This Means for You

- The migration will be executed in a **phased approach**, ensuring a smooth and controlled transition
- **No customer will be migrated without prior communication, planning, and explicit consent**
- There will be **no disruption to your existing MDR services** during the transition

Key Enhancements

- **+6 months additional data retention** at no extra cost
- **Expanded regional data residency**, improving compliance and performance across global locations
- Enhanced detection and response capabilities through Google SecOps

Timeline

- End of life for the existing Splunk platform will be on **April 1st, 2028**
- We already have a phased migration approach which will ensure a seamless transition with no disruption to your existing services

Next Steps

Honeywell teams will contact you to:

- Align on your **migration timeline**
- Plan and execute the transition
- Address any technical or operational questions

For more details or to discuss your migration plan, please contact your Honeywell representative.

We remain committed to ensuring a secure, seamless, and customer-driven transition to our next-generation OT MDR platform.

End of Sale Announcement for 2MLL-BIPT and 2MLL-BIPT-CC, BACnet module for MLPLC.

Honeywell's MasterLogic PLC (MLPLC) platform has been in service for nearly two decades. 2MLL-BIPT and 2MLL-BIPT-CC modules support BACnet communication. However, continued support is increasingly affected by suppliers discontinuing essential components. Hence, 2MLL-BIPT and 2MLL-BIPT-CC will be in "Phase Out" support status starting from July 1, 2026.

One can use Modbus TCP to BACnet converter for BACnet functionality requirements.

What is meant for Phased Out support:

- No new parts/components/parts are available
- Commercially reasonable support effort
- Support services to modernize existing systems are available

Please contact Offering Manager or Honeywell representative for more information.

CC-PCNT02 (C300 Controller) Transitioning to Legacy Support Effective July 1, 2026

Honeywell is committed to continuously enhancing, improving, and innovating its products to provide customers with state-of-the-art technology solutions. As part of this commitment, Honeywell introduced the Experion PKS PCNT05 controller in August 2021 as the next generation of process control technology.

The PCNT05 controller delivers significant advancements over previous generations, including a higher-performance processor, increased memory capacity, enhanced cybersecurity features, and an extended operating temperature range for deployment in remote environments. In addition, the controller incorporates a built-in control firewall and supports Control HIVE, enabling improved system security, scalability, and operational efficiency.

With the availability of the CC-PCNT05 platform and the upcoming On-Process Migration capability in Experion R600, the Experion C300 Controller (CC-PCNT02) will transition to Legacy Support status effective July 1, 2026.

Off-Process Migration from CC-PCNT01/02 controllers to the CC-PCNT05 platform is currently available through the [Upgrade Kit](#) (with sign-in) at a discounted price. To qualify for this discounted pricing, the replaced CC-PCNT01/02 controller must be returned to Honeywell.

Beginning with Experion R600, Honeywell will support **On-Process Migration**, enabling users to replace existing CC-PCNT01/02 controllers with CC-PCNT05 controllers while maintaining plant operations and minimizing process disruptions. The R600 release will also introduce additional enhancements to the CC-PCNT05 platform.

The following are the key features of CC-PCNT05:

- Same footprint as C300 (CC-PCNT02) & IOTA
- Follows current C300 licensing for conventional deployments
- Supports traditional 1:1 redundant and control HIVE deployment
- Hardened controller for harsh environment. (HAZLOC 2, -40 to 70 DegC)
- Enhanced Performance and Capacity
- Enhanced Security & Embedded control firewall - ISA Secure [CSA L2](#)
- Enabled controller lock feature for enhanced security
- Enabler for Experion HIVE enhanced networking for network segregation (VLANs/PRP)
- New enhanced memory backup Module (CC-SCMB05)
- Foundation for Control HIVE Operational/Runtime Benefits

The CC-PCNT02 controller has been under RQUP control since February 2025. In accordance with the HPS Support Policy, the product is available only as a hardware failure replacement part, with GTAC support expected to continue for approximately 10 years. However, the intended support duration is subject to business considerations, including, but not limited to, component availability and support from third-party suppliers. Support may be discontinued earlier if the Standard Hardware Product reaches its Phased-Out lifecycle status.

Please refer to the [HPS LIFECYCLE SUPPORT](#) Policy (with sign-in) for additional details regarding support for Standard Hardware Products.

Experion LX R530	R530.1	Current	2025-01	System Software
Experion MX CDMV Controls R720	R720.1	Supported	2023-08	Software Package
Experion MX CDMV Controls R720	R720.3	Current	2023-08	Software Package
Experion MX MDMV Controls R720	R720.1	Supported	2023-08	Software Package
Experion MX MDMV Controls R720	R720.3	Current	2023-08	Software Package
Experion MX Scanner Software	R304.1	Current	2025-05	Standalone Software
Experion MX Scanner Software	R303.x	Supported	2023-08	Standalone Software
Experion MX Scanner Software	R302.x	Supported	2022-05	Standalone Software
Experion MX Scanner Software	R301.x	Supported	2021-02	Standalone Software
Experion MX R720	R720.2	Supported	2023-06	System Software
Experion MX R720	R720.3	Current	2023-06	System Software
Experion PKS R52x	R520.2	Supported	2021-08	System Software
Experion PKS R53x	R530	Current	2024-03	System Software
Fail Safe Controller R80x	R801.5	Current	2014-10	System Software
Field Device Manager R52x	R520.1	Supported	2022-11	Standalone Software
Field Device Manager R52x	R520.2	Supported	2023-01	Standalone Software
Field Device Manager R52x	R520.1 U1	Supported	2022-11	Standalone Software
Field Device Manager R52x	R520.2 U1	Supported	2023-01	Standalone Software

Field Device Manager R52x	R521.1	Supported	2023-08	Standalone Software
Field Device Manager R52x	R521.1 U1	Supported	2024-08	Standalone Software
Field Device Manager R53x	R530.1	Supported	2024-05	Standalone Software
Field Device Manager R53x	R530.1 U1	Supported	2024-06	Standalone Software
Field Device Manager R53x	R530.1 U2	Supported	2024-12	Standalone Software
Field Device Manager R54x	R540.1	Supported	2025-01	Standalone Software
Field Device Manager R54x	R540.2	Current	2025-08	Standalone Software
Forge Blending and Movement R520.y	R520.2	Supported	2021-08	Software Package
Forge Cybersecurity Suite-Enterprise Core and Premium	R204.1	Current	2021-06	Standalone Software
Forge Cybersecurity Suite-Enterprise Core and Premium	R203.1	Supported	2021-02	Standalone Software
Forge Cybersecurity Suite-Site	R204.1	Current	2021-06	Standalone Software
Forge Cybersecurity Suite-Site	R203.1	Supported	2021-02	Standalone Software
HFAM Alarm Performance Optimizer R1.1.0	R1.x.y	Supported	2021-10	Standalone Software
HFAM Alarm Performance Optimizer R2.0.0	R2.x.y	Supported	2024-08	Standalone Software
HFAM Alarm Performance Optimizer R3.0.0	R3.x.y	Current	2025-08	Standalone Software
HFAM Reporting R2.2.x (Formerly DynAMo Metrics and Reporting)	R2.2.x	Supported	2022-07	Standalone Software
HFAM Reporting R2.3.x (Formerly DynAMo Metrics and Reporting)	R2.3.x	Current	2025-03	Standalone Software
Honeywell Blending and Movement R530.y	R530.4	Current	2024-01	Software Package
Honeywell Connected Workforce Competency	R1.0.x	Supported	2023-05	SaaS Offering
Honeywell Forge Inspection Rounds	R8.4	Current	2021-11	Standalone Software
Honeywell Forge Inspection Rounds	R7.6	Supported	2020-07	Standalone Software
Honeywell Forge Workforce Competency	R520.1	Supported	2021-09	Standalone Software
Honeywell Forge Workforce Competency	R521.1	Supported	2022-10	Standalone Software
Honeywell Trace R160	160.1	Supported	2023-09	Standalone Software
Honeywell Trace R160	160.2	Supported	2024-03	Standalone Software
Honeywell Trace R160	160.3	Supported	2024-09	Standalone Software
Honeywell Trace R170	170.1	Current	2026-02	Standalone Software
Honeywell Trace R170	170.2	Current	2026-05	Standalone Software
Honeywell Workforce Competency	R530.1	Current	2024-07	Standalone Software

MetalsMaster	R140.1	Supported	2024-02	System Software
MetalsMaster	R200.1	Current	2026-01	
Operations Safety Advisor R100.x	R100.0	Current	2020-08	SaaS Offering
PlantCruise R530	R530.1	Current	2025-01	System Software
PMD R92x	R920.1	Supported	2021-09	System Software
PMD R92x	R920.2	Supported	2023-07	System Software
PMD R92x	R920.3	Current	2024-07	System Software
PMD R93x	R930.1	Current	2025-04	System Software
PMD R93x	R930.2	Current	2026-05	System Software
Predict-Amine	R4.0	Supported	2017-09	Standalone Software
Predict-Crude	R2.0	Supported	2015-09	Standalone Software
Predict-O&G	R7.1	Supported	2018-09	Standalone Software
Predict-Pipe	R5.0	Supported	2018-12	Standalone Software
Predict-RT	R140	Supported	2019-06	Standalone Software
Predict-SA	R2.0	Supported	2014-12	Standalone Software
Predict-SW (Sour Water)	R4.0	Supported	2018-12	Standalone Software
Procedure Analyst R41x	R410.0	Supported	2013-01	Standalone Software
Procedure Analyst R43x	R430.1	Supported	2015-06	Standalone Software
Procedure Analyst R50x	R500.2	Supported	2017-03	Standalone Software
Procedure Analyst R51x	R511.1 Patch 1	Current	2020-09	Standalone Software on Experion PKS Media
Process Safety Analyzer R210	2.1.x	Supported	2022-09	Standalone Software
Process Safety Analyzer R2.2.0	2.2.x	Current	2025-03	Standalone Software
Process Safety Workbench v5.0.2.x	v5.0.2.1	Current	2023-02	SaaS Offering / Standalone SW
Profit Suit R51x	R511.1	Supported	2021-08	Standalone Software
Profit Suit R51x	R511.1	Supported	2021-07	Standalone Software
Profit Suit R51x	R512.1	Supported	2022-07	Standalone Software
Profit Suit R51x	R513.1	Supported	2023-07	Standalone Software
QCS SE	R120.1	Supported	2024-02	System Software
QCS SE	R200.1	Supported	2024-12	System Software
QCS SE	R210.1	Current	2026-01	System Software
Safety Historian R20x	R202.1	Current	2014-03	System Software
Safety Management Systems R214	R214.1	Current	2025-12	System Software
Safety Management Systems R213	R213.2	Supported	2024-01	System Software
Safety Manager R15x	R154.6	Supported	2012-04	System Software
Safety Manager R16x	R162.14	Current	2014-10	System Software
Secure Media Exchange (SMX)	R100	Supported	2017-08	Standalone Software
Secure Media Exchange (SMX) + GARD	R101	Supported	2018-03	Standalone Software

Secure Media Exchange (SMX) + GARD	R102.3	Supported	2019-01	Standalone Software
Secure Media Exchange (SMX) + GARD	R104	Supported	2019-05	Standalone Software
Secure Media Exchange (SMX) + GARD	R201	Supported	2020-09	Standalone Software
Secure Media Exchange (SMX) + GARD	R202	Supported	2022-02	Standalone Software
Secure Media Exchange (SMX) + GARD	R202.13	Supported	2024-01	Standalone Software
Secure Media Exchange (SMX) + GARD	R203.1	Current	2025-01	Standalone Software
Socrates	R10.0	Supported	2019-03	Standalone Software
Symphonite Integration and Analytics R200x	R200.2	Supported	2017-07	Standalone Software
Symphonite Integration and Analytics R201x	R201.2	Current	2020-01	Standalone Software
Production Accounting & Reconciliation R3.1.x	R3.1.0	Current	2025-10	Standalone Software
Production Accounting & Reconciliation R212.x	R212.3	Supported	2022-08	Standalone Software
Production Accounting & Reconciliation R211.x	R211.2	Supported	2020-12	Standalone Software
System Inventory Tool R30x	R300.1	Current	2019-09	Standalone Software
Profit Suit R51x	R514.1	Supported	2024-07	Standalone Software
Profit Suit R52x	R520.1	Current	2025-12	Standalone Software
Taiji PID 320x	R321.1	Current	2023-06	Standalone Software
Taiji PID 320x	R320.1	Supported	2021-04	Standalone Software
TCMI R10x	R100.8	Current	2017-11	System Software
TPN R688.x	R688.7	Supported	2019-01	System Software
TPN R690.x	R690.4	Current	2024-04	System Software
Uniformance Asset Sentinel R53x	R531.4	Supported	2021-04	Standalone Software
Uniformance Asset Sentinel R53x	R532	Supported	2021-09	Standalone Software
Uniformance Asset Sentinel R53x	R532.4	Supported	2022-07	Standalone Software
Uniformance Asset Sentinel R53x	R532.5	Supported	2022-12	Standalone Software
Uniformance Asset Sentinel R54x	R540.1	Supported	2023-08	Standalone Software
Uniformance Asset Sentinel R54x	R540.2	Supported	2024-02	Standalone Software
Uniformance Asset Sentinel R54x	R540.3	Supported	2024-07	Standalone Software
Uniformance Executive R31x	R311.1	Supported	2018-03	Standalone Software
Uniformance Executive R32x	R320.1	Supported	2018-09	Standalone Software
Uniformance Executive R33x	R330	Current		Standalone Software
Uniformance Insight R2.3.x	R2.3.0	Supported	2021-12	Standalone Software
Uniformance Insight R2.4.x	R2.4.0	Supported	2022-07	Standalone Software

Uniformance Insight R2.5.x	R2.5.0	Current	2024-09	Standalone Software
Uniformance Insight R22x	R220.1	Supported	2020-09	Standalone Software
Uniformance KPI R12x	R121.1	Supported	2017-05	Standalone Software
Uniformance KPI R13x	R131.1	Supported	2019-11	Standalone Software
Uniformance KPI R13x	R130.1	Supported	2018-03	Standalone Software
Uniformance KPI R14x	R140.1	Current	2023-11	Standalone Software
Uniformance PHD R41x	R410.1	Supported	2021-03	Standalone Software
Uniformance PHD R43x	R430.1	Current	2023-08	Standalone Software
UniSim Design	R510	Current	2024-11	Standalone Software
UniSim Design	R500	Supported	2023-11	Standalone Software
UniSim Design	R492	Supported	2022-11	Standalone Software
UniSim Design	R491	Supported	2022-05	Standalone Software
UniSim Design	R490	Supported	2021-11	Standalone Software
UniSim Design	R481	Supported	2021-06	Standalone Software
UniSim Design	R480.1	Supported	2020-10	Standalone Software
UniSim Design	R471.1	Supported	2020-01	Standalone Software
UniSim Design	R470.1	Supported	2019-10	Standalone Software
UniSim Design	R461.1	Supported	2019-06	Standalone Software
UniSim Design	R460.1	Supported	2018-05	Standalone Software
Terminal Manager R671	R671.1	Supported	2019-01	Standalone Software
Terminal Manager R680	R680.1	Supported	2019-10	Standalone Software
Terminal Manager R681	R681.1	Supported	2020-02	Standalone Software
Terminal Manager R690	R690.1	Supported	2020-10	Standalone Software
Terminal Manager R700	R700.1	Supported	2021-08	Standalone Software
Terminal Manager R701	R701.1	Supported	2022-05	Standalone Software
Terminal Manager R702	R702.1	Supported	2023-02	Standalone Software
Terminal Manager R703	R703.1	Supported	2023-09	Standalone Software
Terminal Manager R704	R704.1	Supported	2024-01	Standalone Software
Terminal Manager R705	R705.1	Supported	2024-07	Standalone Software
Terminal Manager R706	R706.1	Supported	2024-09	Standalone Software
Terminal Manager R710	R710.1	Current	2025-04	Standalone Software
Immersive Field Simulator (IFS)	R140	Current	2026-04	Standalone Software
Immersive Field Simulator (IFS)	R131.1 (Release for IFS client machine only)	Supported	2025-04	Standalone Software
Immersive Field Simulator (IFS)	R130.2	Supported	2025-08	Standalone Software
Immersive Field Simulator (IFS)	R123.1 Update 2	Supported	2024-06	Standalone Software
Immersive Field Simulator (IFS)	R121.1	Supported	2023-11	Standalone Software

Production Accounting and Reconciliation (PAR)	R3.1.1	Supported	2026-05	Standalone Software
Production Accounting and Reconciliation (PAR)	R3.1.0	Supported	2025-09	Standalone Software
Production Accounting and Reconciliation (PAR)	R2.1.3	Supported	2025-03	Standalone Software

Note: Software releases not listed in the table are in “Phased Out” lifecycle status. The HPS Product Support Guide for Control, Safety and Monitoring Systems is available for download following link below (Requires Login)
<https://process.honeywell.com/us/en/support/technical-publication?search=product%2520support%2520guide%2520for%2520control%2520safety%2520and%2520monitoring%2520systems>

Definitions:

“Software Package” means any HPS software product developed for the specific functional release of system software.

“Standalone Software” means any HPS software product developed for independent operation from a system software functional release.

“System Software” means machine-readable data and executable programs used to define the functionality of the HPS control system and standard hardware products, but does not include firmware, operating system, application software or other software products.

“SaaS Offering” means any HPS software product which applications are hosted through the cloud and made available to end users over the internet.
