Small project service "Modbus connection to a PLC"

- Clarification of customer requirements
(Interfaces and installation conditions on site, retrieval system, retrieval protocol, etc.)
- Clarification of the necessary customer information in the "Requirements for a Successful Commissioning". These are attached to the email.
- If necessary, creation of a parameter profile (wpp file) for the volume corrector EK2xx
- If technically possible (e.g. by ordering new "preset" devices):
Test of the volume corrector EK2xx in the factory
- Documentation in English

Not included

- Personal presence on site (the communication takes place exclusively by email)
- Possible travel costs and expenses
- Installation and commissioning on site

Remarks

- If the devices are already installed on site, the customer must download the created parameter profile on site.
The parameterization **software enSuite** is required for this, which can be downloaded free of charge from the Elster website in the "Software download" area.
- In addition, a suitable **OPTO head** is required in order to be able to establish a connection to the end device! This can be ordered separately from Elster under order no. : 041 15 530 (USB connection including driver for Windows XP to Windows 10).
- If necessary, the download and commissioning can be carried out by a customer service technician from Elster (separate order item)
