

Connecting people and processes with the most advanced, open, and secure control and safety system

EXPERION® PROCESS KNOWLEDGE SYSTEM

IMPROVE PROJECT EXECUTION

Experion PKS combined with our innovative project methodology, LEAP™, improves project effectiveness 15%

Universal Channel Technology

Experion Virtualization

Collaborative Autonomous Project Environment (CAPE)

THE IMPACT

Standardized solutions

Modular engineering - late changes are no problem

Simple connectivity to existing assets

FLEXIBILITY around project engineering, visualization, and operation

Access to experts worldwide

Remote, global, SECURE access

Ease of collaboration

Save up to **30%** automation CAPEX

Increase schedule flexibility by up to **25%**

Reduce project risk

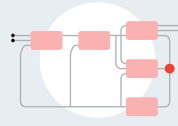

OPEN SYSTEMS INTEGRATION

Experion Orion Console

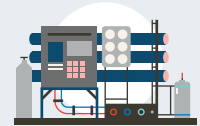

Experion Electrical Control System

Multivariable APC in the Controller

WirelessHART and ISA 100 Support

Automated Skid Integration

EXPERION PKS RESULTS

15%

improved project effectiveness

40%

Reduce operator-related incidents

30%

Reduce lifecycle management costs

HONEYWELL EXPERIENCE

20 million I/O channels in operation around the world

45 years of continuous evolution and modernizing intellectual property

6,000+ engineers and designers in projects and services

1,000+ projects completed in our secure cloud per year
