

THE ROADSHOW ROLLS ON - OUR NEXT STOP CAN BE YOURS

Honeywell Process Measurement and Control is on the road with demos of our Field Instruments, Process Instruments, Modular Systems and Software solutions. We can bring this event to your local area.

THIS IS WHAT YOU'RE GOING TO SEE AND EXPERIENCE ONCE THE DEMOVAN IS AT YOUR DOOR STEP:

- Featuring XNX™ universal transmitter for toxic, oxygen and combustible gas detection which supports a wide range of sensors and is the right solution for the key industrial applications.
- We will showcase pressure, temperature, flow and level transmitters wired and communicating with our RTU, PLC, and distributor control system.
- Test Process Instruments products like liquid analytical, electric actuators, and paperless recorders.
- Access operator console, which allows you to test our software and view operator graphics.
- Walk through our instrument shop, where you can get hands-on experience with our field instruments.
- Connect with specialized guidance from Honeywell experts and local channel partner experts available on the Road Show to answer your questions.

Honeywell
