

EXPERION MX COMMON SENSOR CALIBRATION AND MAINTENANCE

COURSE OVERVIEW

Course Number: EMX-7009-MT

Course Duration: 90 Minutes

Prerequisite Course (s): None

This module describes the measurement principles, maintenance, and calibration of common sensors used on an Experion MX Scanner. It is presented in two units, which will allow you to explore the different technical concepts at your own pace.

COURSE DELIVERY OPTIONS

- Modular Training (MT)

COURSE OBJECTIVES

- Sensor overview, Maintenance overview, and Calibration overview of these sensors:
 - Basis Weight Sensor
 - Caliper Sensor
 - MXIR Sensors
- Sensor overview of these sensors:
 - Air Gap Temperature Sensor
 - Z-Axis Sensor
