

EXPERION PKS: MIGRATION READINESS AND SYSTEM ENHANCEMENTS

COURSE OVERVIEW

Course Number: BT-1001

Course Duration: 4 Days (30 days access)

Prerequisite Course (s): None

Program Objectives

- Know the enhancements of migrated system
- Realize the benefit of the migrated system deployed in the plant

Offering Details

- Training courses include various topics: Introduction to migration, planning of migrations, and more
- Five participants are included in the base package
- These courses are designed for managers, engineering and/or maintenance personnel
- These courses provide 100% flexibility thru self-paced and modular training format

COURSE DELIVERY OPTIONS

- Asynchronous Training (AT)
- Modular Training (MT)

COURSES

EXP-7060-MT - Experion PKS Migration Introduction

- This training module describes about overview of Experion system migration. It describes about two migration options: on-process migration and off-process migration

EXP-7061-MT - Experion PKS Migration Planning

- This training module describes how to plan the migration. It describes migration COE recommendations to be followed while planning the migration

EXP-7062-MT - Experion PKS Checking Migration Readiness

- This module describes how to check the migration readiness of Experion system. It also explains Migration COE recommendations to follow while checking readiness.

EXP-7104-MT - Experion PKS R410 To R520 Server Enhancements

- This training module describes Experion R410 to R520 Server enhancements

EXP-7105-MT - Experion PKS R410 To R520 CEE Enhancements

- This training module describes Experion R410 to R520 CEE enhancements

EXP-7106-MT - Experion PKS R410 To R520 HMI Enhancements

- This training module describes Experion R410 to R520 HMI enhancements

EXP-1023-AT - Experion PKS: Advanced - Experion LCN System Troubleshooting and Maintenance

- Course participants will learn to troubleshoot and maintain Experion LCN system.
