

MXPROLINE: FUNDAMENTALS – SCANNER AND SENSOR MAINTENANCE

COURSE OVERVIEW

Course Number: MXP-0004

Course Duration: 2 Days

Prerequisite Course (s): None

From this MXProLine Scanners and Sensors course, you will learn how to set up and maintain these families of scanners:

- 4080-xx
- 5080-xx
- 6080-xx

and learn how to maintain these sensors:

- 2213 Caliper
- 2214 Caliper
- 4203 Nuclear
- 4217 X-Ray
- 4264 IRPlus
- 4405 IR Polymer

COURSE DELIVERY OPTIONS

- Asynchronous Training (AT)
 - Self-paced with 10 days to complete

COURSE OBJECTIVES

- Verify the operation of each family of scanners
- Set up operational parameters for each family of scanners
- Maintain each family of scanners
- Verify the operation of each sensor
- Verify the measurement accuracy of each sensor
- Verify the stability of each sensor
- Calibrate each sensor
- Maintain each sensor
