

## EXPLORING HONEYWELL TRACE

### COURSE OVERVIEW

**Course Number: TRC-7004-MT**

**Course Duration: 120 minutes**

**Prerequisite Course (s): None**

This module introduces the Dashboard, Tag References, Logical View, Hardware View, and Networking View in the latest release of Trace. Through different modules, you can explore Honeywell Trace features.

Module 01 - Deep dive into the Trace Dashboard

Module 02 - Using the Tag References

Module 03 - Using the Logical View

Module 04 - Using the Hardware View

Module 05 - Using the Network View

Module 06 - Using the Global Search

Module 07 - Enhancements to Honeywell Trace

### COURSE DELIVERY OPTIONS

- Modular Training (MT)

### COURSE OBJECTIVES

- Identify the components of the Trace
- Dashboard, navigate across the Dashboard and how to use it effectively
- Explain how to use the Tag References in Trace
- Identify the Logical View of Trace and use it effectively to drill down critical information of the system and its components
- Explain the Hardware View and the functional grouping and hierarchical view of the System
- Explain how to drill down the hierarchy of network elements and how to go about traversing the network of connected sub elements
- Explain Global Search within Honeywell and the applicable Licenses
- Learn about the Systems and Feature Enhancements to Honeywell Trace
