

HONEYWELL AUTOMATION CERTIFIED PROFESSIONAL: EXPERION PKS - SERVER ENGINEERING - CERTIFICATION

PROGRAM OVERVIEW

Course Number: HACP-EXPSECT

Course Duration: Up to 1 Hour

Prerequisite Course (s): HACA-EXPCT

The HPS Honeywell Professional Certification examination provides a means for students to demonstrate that they have mastered the content of critical courses.

This is a proctored and closed book exam. It can be taken in person at any global Honeywell Academy location or Virtual.

It will normally require no more than 60 minutes to complete. In the event they fail the first examination, they need to purchase and re-register for the next proctored exam(s) within 90 days. If they fail twice, we recommend the students to complete the HACP-EXPSE training course.

EXAM OPTIONS

- In-Center at Honeywell Academy facility
- Virtual via e-Learning

COURSE LANGUAGES

- English

PROGRAM OBJECTIVES

- Allows the participant to validate that he or she has understood the breadth of course material
- Demonstrates a complete understanding of various tasks related to the Experion PKS System. These tasks include planning the system, configuring the Server, and setting up the Fault-Tolerant Ethernet, SCADA Points, Alarms, Alarm Groups, Reports, etc. The course also includes practical exercises where participants learn how to plan, install, configure, and administer the Experion PKS system.
- Demonstrates insight into the overview of VMware virtualization and ESXi Architecture. You will also understand Experion PKS topologies in the virtual environment.
