

HONEYWELL BLENDING AND MOVEMENT: FUNDAMENTALS – BLEND CONTROLLER (BC) MAINTENANCE

COURSE OVERVIEW

Course Number: HBM-0001

Course Duration: 2 Days

Prerequisite Course (s): None

This Blend Controller Maintenance Training course provides operations and maintenance engineer training information to Honeywell customers using Blend Controller (BC) in a combined lecture and lab environment.

Topics covered include:

- Application Functional Overview
- Application Setup and Monitoring
- Software Structure and Configuration
- Troubleshooting and Maintenance

COURSE DELIVERY OPTIONS

- Instructor-Led Training (ILT)
- Virtual Instructor-Led Training (VILT)

COURSE OBJECTIVES

- Operate the BC software. The applications' operator interface uses HMI Web graphics
- Provide first line support of offsite operations
- Develop troubleshooting and maintenance techniques for the site-specific application
- Make minor configuration changes to tune system and meet operational needs
- Provide a knowledgeable customer focal point for discussion of issues among management, operations, and maintenance
