

# HONEYWELL IONIC™ CONTROL AND ENERGY MANAGEMENT

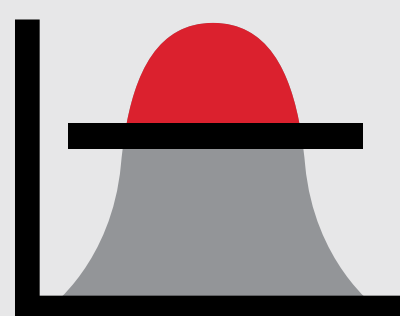

A fully integrated energy management system functions as a microgrid to help improve business resilience, increase renewable energy use, and reduce operating and energy costs.

## APPLICATIONS

Honeywell **software** supports a variety of capabilities and use cases, including:

Energy Resilience and Demand Management

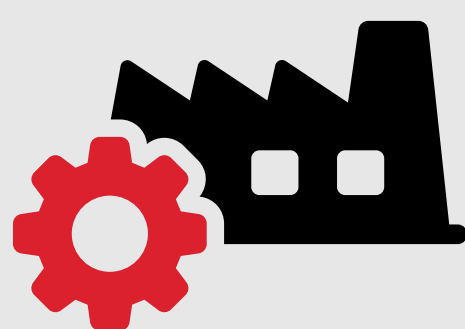

Peak Shaving

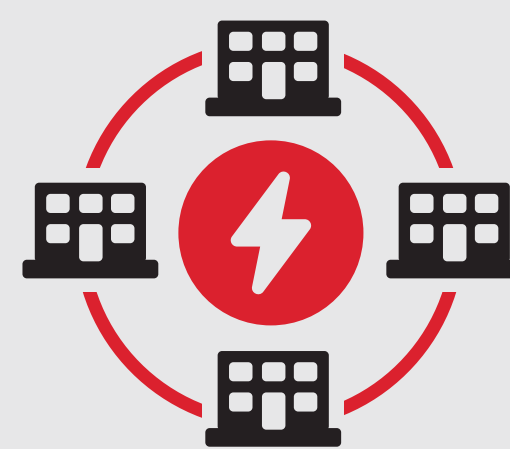

Revenue Stacking

Renewables Incorporation

Gas Turbine + BESS Solution

Virtual Power Plant

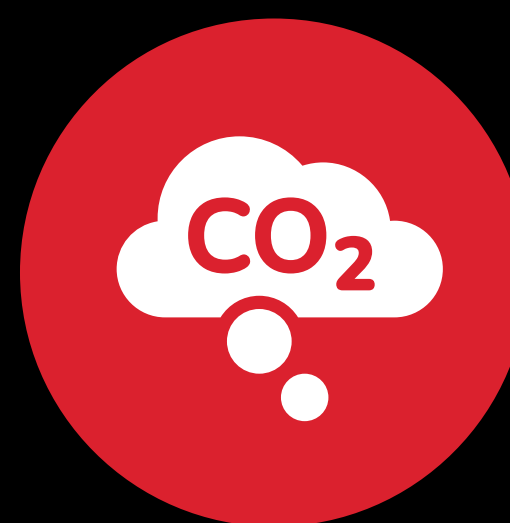

## BENEFITS

Improved business continuity

Reduced energy costs

Auto-producer costs & emissions

## SUMMARY

Create a microgrid to integrate assets – from traditional gas turbines and diesel generators, to renewable power, the grid, and BESS – better supporting energy decisions across industrial operations.
